RE:

B85-Chennault Site 5 (160 Acres)

Phase I Environmental Site Assessment

Utility Systems

Dear Gentlemen:

Land Surveying

SJB Group, LLC (SJB) has been authorized by Louisiana Economic Development (LED and Southwest Louisiana Economic Alliance (SWLA) to perform due diligence investigations to determine the existence of fatal flaws, if any, that would inhibit the development of Chennault Site 5 (+/- 160 acres), located southeast of the City of Lake Charles in Calcasieu Parish, Louisiana.

Construction Services

the City of Lake Charles in Calcasicu Farish, Edulsiana.

**Environmental Services** 

The attached report presents the findings of the Phase I Environmental Site Assessment (ESA) for the site. The Phase I ESA was performed by SJB Group, LLC of Baton Rouge, LA.

Real Estate Services

Please feel free to contact me at (225) 769-3400, at any time, should you have any questions or need further information.

#### 1.0 EXECUTIVE SUMMARY

Louisiana Economic Development (LED) and SWLA Economic Development Alliance (SWLA) retained SJB Group, LLC (SJB) to perform a Phase I Environmental Site Assessment (ESA) on a ±160.0 acre tract near Chennault Airport located off of Tom Watson Road, Lake Charles, Calcasieu Parish, Louisiana. A vicinity map identifying the site's general location is presented as Figure 1.

This Phase I ESA is consistent with protocols established in the American Society for Testing and Materials (ASTM) publication "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process" (Designation E 1527-05, referred to as the ASTM Standard) to provide "due diligence" for commercial and industrial real estate transactions.

The purpose of this Phase I ESA is to identify historical or overt physical evidence of current or past activities or materials at the site and its immediate vicinity which constitute "recognized environmental conditions," (RECs) defined by the ASTM Standard to be "the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release . . . into structures on the property or into the ground, groundwater, or surface water of the property."

On May 7<sup>th</sup> of 2014, SJB's environmental specialists performed a site reconnaissance of the subject property and its adjacent properties. The site consists of a maintained pasture area adjacent to the east of Chennault Airport runway and taxi-way areas. There are no buildings present on the property. Photographs were taken documenting field observations and are included in this report.

SJB obtained historical documentation of the site's past uses and activities in order to identify possible recognized environmental conditions. Sources of historical documentation for this report included historical aerial photographs and topographic maps, City Directories, Records of Verbal Communication, and an Environmental Database Report provided by Banks Environmental Data.

Records reviewed by SJB, dating back to 1942, show the past uses of the site consisting primarily of undeveloped grassland areas and forested areas.

Based on historical sources dating back to the late 1942, interviews with people knowledgeable of the site history, environmental database reviews, and a site inspection, SJB has identified no current recognized environmental concerns and no historical recognized environmental conditions as defined in ASTM Standard E 1527-05. The potential for environmental impacts to the site associated with unknown past activities may exist and additional investigation could determine if hazardous materials or petroleum products from on-site of offsite sources have impacted the site.

# 2.0 <u>INTRODUCTION</u>

## 2.1 GENERAL

At the request of Louisiana Economic Development (LED) and SWLA Economic Development Alliance (SWLA), SJB Group, LLC (SJB) conducted a Phase I Environmental Site Assessment (ESA) of ±160.0 acre tract located off of Tom Watson Road, Lake Charles, Calcasieu Parish, Louisiana.; hereafter referred to as the site. It is our understanding that Louisiana Economic Development (LED) and SWLA Economic Development Alliance (SWLA) are looking to develop the site and wishes to document the environmental condition and history of the property for due-diligence purposes as required by the comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) of 1980 to meet the requirement for the "innocent landowner" defense in cases of the purchase and/or development of contaminated properties.

# 2.2 <u>SCOPE AND PURPOSE</u>

The scope of work performed by SJB is consistent with protocols established in the American Society for Testing and Materials (ASTM) publication "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process" (Designation E 1527-05, referred to as the ASTM Standard) to provide "due diligence" for commercial real estate transactions. The purpose of this Phase I ESA is to identify historical or overt physical evidence of current or past activities or materials at the site and its immediate vicinity which constitute "recognized environmental conditions," defined by the ASTM Standard to be "the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release . . . into structures on the property or into the ground, groundwater, or surface water of the property." Accordingly, this ESA acts to reduce the risk of unknown environmental liabilities by identifying potential items of concern.

The scope of work included the following:

- Review of information on former ownership and occupancy of the site;
- Determination of area geology, hydrology, hydrogeology, and other physical setting features;
- Historical land use research and interviews of individuals familiar with current and
  past activities conducted on and adjacent to the site, review of historical aerial
  photographs, topographic maps, and city directories;

- Review of published Federal and State environmental regulatory agency database information to establish documented regulatory compliance history at the site and surrounding properties;
- Inspection of the site and surrounding areas to determine if environmental concerns are visible or indicated, including photographic documentation of conditions encountered; and
- Preparation of a report of findings including site photographs and copies of historical documentation.

## 2.3 SIGNIFICANT ASSUMPTIONS

SJB assumed that all information provided by Banks Environmental Data regarding the regulatory status of facilities within the appropriate minimum search distances was complete, accurate, and current. SJB also assumed that all information provided through interviews of pertinent agencies, occupants and persons familiar with the property was complete, truthful, and unbiased.

# 2.4 LIMITATIONS AND EXCEPTIONS

SJB performed the Phase I ESA at the site in general conformance with the ASTM Standard for a Phase I ESA. The ASTM Standard for Phase I ESAs does not include a determination of floodplain or wetland location(s), structural or foundation evaluation, asbestos, lead, or mold surveys and inspections. SJB conducted no sampling of surface water, groundwater, or soils for this report.

This report was limited to readily available information at the time that the report was prepared. The possibility of changing environmental regulatory conditions and site activities after the assessment limits the client's reliance upon this assessment to a period of 180 days from the issuance of this report.

The findings and conclusions contained in this report are based on conditions observed at the time of the site inspection; good faith reliance upon information gathered from interviews and records, information reasonably ascertainable within the time and cost constraints for the project, and the limitations of the procedures and methodologies utilized. No individual section of the report should be relied upon alone. The report should be read in its entirety to obtain a more complete understanding of the information provided and to assist in any decisions or actions relative to this report. One exception to the ASTM Standard included the lack of title records for the property.

Based on these limitations, this report cannot be construed as a warranty that no environmental condition remains undiscovered. There is a possibility that conditions may exist that could not be identified within the scope of the assessment, or that were not apparent during the site visit.

The ASTM Standard states that the assessment "is intended to reduce, but not eliminate, uncertainty regarding the potential for RECs in connection with a property".

SJB offers no warranty, expressed or implied that all recognized environmental conditions or regulatory liabilities have been identified by a thorough, professionally prudent investigation conducted within the scope, schedule, and budget of this ESA. This ESA has been prepared for the use of Louisiana Economic Development (LED) and SWLA Economic Development Alliance (SWLA) and should be used in its entirety.

# 2.5 <u>USER RELIANCE</u>

Any reproductions of this report cannot be made without the expressed written approval from Louisiana Economic Development (LED) and SWLA Economic Development Alliance (SWLA), for whom it was prepared. The general terms and conditions under which this assessment was prepared apply solely for the exclusive use of Louisiana Economic Development (LED) and SWLA Economic Development Alliance (SWLA). SJB specifically disclaims any liability to third parties.

## 3.0 SITE DESCRIPTION

### 3.1 <u>LOCATION AND LEGAL DESCRIPTION</u>

The site is located in Lake Charles, Calcasieu Parish, Louisiana. It is geographically located at latitude 30.216592 and longitude -93.141766. The site is in Section 1 & 12, Township 9 & 10 South, Range 8 West, Calcasieu Parish. Figure 1 is a vicinity map showing the location of the site.

#### 3.2 SITE AND VICINITY GENERAL CHARACTERISTICS

The site is ±160.0 acres located on the south side of Tom Watson Road. It is rectangular in shape with rough dimensions of 6,000 feet by 1,200 feet. The site has 200 feet of frontage along Tom Watson Road which it is accessible. The site consists of maintained open pastures throughout the site. The Site was previously vacant grasslands. The site maintain by the Chennault Airport and is utilized as the eastern runway buffer. Figure 2 is a site plan identifying features observed during the inspection of the site.

# 3.3 <u>CURRENT USE OF THE SITE</u>

The site is currently vacant and is cleared, maintained and used as the eastern buffer to the Chennault Airpark runways. There appears to have some operations associated with the Chennault Airport taking place on the site in which materials are temporary stored. A railroad runs along the eastern border of the site. Several drainage ditches run throughout the site and a three small ponds are located near the northern portions of the site.

# 3.4 <u>CURRENT USE OF THE ADJOINING PROPERTIES</u>

The site is bordered to the north by Tad Lock Freight and Calcasieu Parish Mosquito Control Department. The site is bordered to the east by Southern Pacific Railroad. The site is bordered to the south by vacant land and to the west by Chennault Airport runways.

## 4.0 USER PROVIDED INFORMATION

#### 4.1 PREVIOUS SITE INVESTIGATIONS

Reports of previous investigations of the site were not available.

#### 4.2 TITLE RECORDS

A chain-of-title report was requested, but was not provided for this report.

# 4.3 ENVIRONMENTAL LIENS OR ACTIVITY AND USE LIMITATIONS

Interviews conducted by SJB indicated no environmental liens were filed against the site.

# 4.4 <u>SPECIALIZED KNOWLEDGE</u>

Specialized knowledge related to the site may be available from the current site owner, the current client, the site occupant, or other sources. SJB did not receive any specialized knowledge regarding the site.

# 4.5 COMMONLY KNOWN OR REASONABLY ASSERTAINED INFORMATION

Chennault Airport, who currently owns the site, informed SJB that to their knowledge, the site has always been vacant land in the past. They stated that the site is used primarily as buffer along the airport taxiways and runways and that to the best of their knowledge, hazardous and/or petroleum products have never been stored or used on the site.

## 4.6 VALUATION REDUCTION FOR ENVIRONMENTAL ISSUES

Interviews conducted indicated that there was not a valuation reduction of this site related to environmental issues.

# 4.7 OWNER, PROPERTY MANAGER, AND OCCUPANT INFORMATION

SJB was not provided with title information for this report. Occupant information was obtained through personal interviews and through a review of city directories. The site is currently owned by Chennault Airport and has been and has always been vacant and maintained.

A summary of the city directory review is provided in Section 5.4.2.

# 4.8 REASON FOR PERFORMING PHASE I ESA

SJB understands that Louisiana Economic Development (LED) and SWLA Economic Development Alliance (SWLA) is contracting this ESA to evaluate the current environmental condition of the site in order to qualify the site for the innocent landowner defense for future development.

## 5.0 ENVIRONMENTAL RECORDS REVIEW

#### 5.1 <u>COMMERCIAL DATABASE SEARCH</u>

SJB contracted Banks Environmental Data to conduct a search of Federal, State, and Tribal Environmental Regulatory databases for information about regulatory notifications and incidents at or in proximity to the Site in accordance with the ASTM Standard. Banks searched the following Standard Environmental Record sources:

- Federal National Priorities List (NPL)
- State National Priorities List (ST NPL)
- Delisted NPL
- Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS)
- Comprehensive Environmental Response, Compensation, and Liability Information System, No Further Remedial Action Planned (CERC-NFRAP)
- Federal Resource Conservation and Recovery Act (RCRA), Corrective Action Sites (CORRACTS)
- Federal Resource Conservation and Recovery Act, Storage and Disposal Facilities (TSD)
- Federal RCRA Large (LG) Quantities Generators List
- Federal Emergency Response Notification System (ERNS)
- United States Engineering Controls List
- State and Tribal Records
- United States with Institutional Controls
- Registered Underground Storage Tank (PST)
- Leaking Registered Underground Storage Tank (LPST)
- United States Brownfields
- Voluntary Evaluation Program Sites (VCP)

Banks also searched the following additional environmental record sources:

- Dry Cleaners (DRYC)
- Industrial Hazardous Waste (IHW)
- Federal RCRA Small (SG) Quantities Generators List

The Banks database search identified ten database entries within the minimum search limits prescribed by the ASTM Standard and 12 unmappable entries. These entries are considered unmappable because insufficient geocode information was available to facilitate accurate mapping. The site was not listed in the databases searched by Banks. The mapped sites include one CER site, one CER NFRAP site, one RCRA GEN site, and seven ST NPL sites. The unmapped entry included ten ERNS sites, one LPST site, and one PST site. The site was not listed in any the databases searched by Banks.

The CER site listed in the Banks report includes Rogers Enterprises (5350 Broad Street). No violations were found for the CER site listed above.

The CER NFRAP site listed in the Banks report includes Chemical Waste Management (4935 E. Broad Street). No violations were found for the CER NFRAP site listed above.

The RCRA GEN site listed in the Banks report includes Calcasieu Parish Mosquito Control (1037 Tom Watson Road). No violations were found for the RCRA GEN site listed above.

The ST NPL sites listed in the Banks report include All Bonds by Lovett (4935 E.. Broad Street), Rogers Enterprises (5350 Broad Street), Northrop Grumman Corp (4400 Sen J Bennett Johnston Ave.), City of Lake Charles Public works Vehicle Maintenance Office (4331 E. Broad Street), L&L Environmental Services Inc. (5117 E. Broad Street), Neff Rental Services, Inc. (5117 E. Broad Street), and Aumillers Petroleum Equipment Inc. (908 Egret Street). No violations were found for the ST NPL site listed above.

The ERNS sites listed in the Banks report include several emergency response notifications involving the Union Pacific railroad that is outside if the 0.5 mile buffer of the site. Several other unmapped ERNS site took place north of the site within the Chennault Airport property that was also outside the 0.5 mile buffer from the site.

The PST site listed in the Banks report includes Chennault Building B (Chennault Airpark). The underground storage tanks were closed and removed. No violations were found for the PST site listed above.

The LPST site listed in the Banks report includes Chennault Building B (Chennault Airpark). The underground storage tanks were closed and removed. No violations were found for the LPST site listed above.

SJB reviewed the unmapped database site and determined that database entry does not represent a potential environmental threat to the site due to the distance from the site, the regulatory status, or the type of facility. The Banks database report is included in Appendix C, and contains a description of the databases searched.

#### 5.2 ADDITIONAL ENVIRONMENTAL RECORD SOURCES

The Louisiana Department of Natural Resources Strategic Online Natural Resource Information System (SONRIS) Database was searched for current and former oil and gas wells. No oil and gas wells were identified on the site.

# 5.3 PHYSICAL SETTING SOURCE(S)

#### 5.3.1 UNITED STATES GEOLOGICAL SURVEY TOPOGRAPHIC MAPS

According to the USGS topographic map, the elevation on and around the site is approximately 16 feet above mean sea level. During the site visit it was noted that Tom Watson Road does appear higher than the site itself.

#### 5.3.2 SITE GEOLOGY AND PEDOLOGY

The site is underlain by Mowata-Vidrine silt loam and Edgerly loam soils. Mowata-Vidrine silt loam soils consists of soils that are poorly drained with high runoff potential. Edgerly loam soils consists of soils that are poorly drained with high runoff potential.

#### 5.3.3 SITE HYDROGEOLOGY

Groundwater flow direction for the site is best determined using site-specific well data. Site-specific well data is unavailable or this site. However, given the relative level surrounding terrain and lack of any significant hydrological surface features such as lakes, rivers, ponds, lower drainage structures, etc., significant groundwater flow would not be expected.

# 5.4 <u>HISTORICAL USE INFORMATION ON SITE AND ADJOINING PROPERTIES</u>

#### 5.4.1 CITY DIRECTORY REVIEW

Banks provided a City Directory Abstract near 4500 Chennault Parkway Lake Charles, Calcasieu Parish Louisiana. Polk's City Directory for years 1964, 1970, 1975, 1980, 1984, 1989, 1994, 1999, 2003, 2008, and 2013 were reviewed to examine the potential for environmental concerns caused by previous owners and/or occupants at or near the site.

In the years 1999, 2003, 2008, and 2013 the subject property was identified in Polk's City Directory as Chennault International Airport.

In 1964 the listings for the surrounding and adjoining properties of the subject site near 4500 Chennault Pkwy; no sites were identified in proximity of the subject site.

In 1970 the listings for the surrounding and adjoining properties of the subject site near 4500 Chennault Pkwy; no sites were identified in proximity of the subject site.

In 1975 the listings for the surrounding and adjoining properties of the subject site near 4500 Chennault Pkwy; no sites were identified in proximity of the subject site.

In 1980 the listings for the surrounding and adjoining properties of the subject site near 4500 Chennault Pkwy; no sites were identified in proximity of the subject site.

In 1989 the listings for the surrounding and adjoining properties of the subject site near 4500 Chennault Pkwy; no sites were identified in proximity of the subject site.

In 1994 the listings for the surrounding and adjoining properties of the subject site near 4500 Chennault Pkwy; no sites were identified in proximity of the subject site.

In 1999 the listings for the surrounding and adjoining properties of the subject site near 4500 Chennault Pkwy included Parish School Bus Transport (3800 Mallard Cove Dr.) and Airborne Express (4520 Chennault Pkwy).

In 2003 the listings for the surrounding and adjoining properties of the subject site near 4500 Chennault Pkwy; no sites were identified in proximity of the subject site.

In 2008 the listings for the surrounding and adjoining properties of the subject site near 4500 Chennault Pkwy included Johnson Controls Inc. (3800 Mallard Cove Dr.).

In 2013 the listings for the surrounding and adjoining properties of the subject site near 4500 Chennault Pkwy included Cornerstone Designs (144 Prospect St.), Dautriel, Ned, & Dautriel, Leon Sr. (3800 Mallard Cove Dr.), and Johnson Controls Inc. (3800 Mallard Cove Dr.).

No businesses, which may have the potential for environmental concerns, were identified on or near the site in the city directory search.

The city directory report is included in Appendix B.

#### 5.4.2 AERIAL PHOTOGRAPHS AND TOPOGRAPHIC MAPS

Historical topographic maps from 1942, 1955, 1967, 1975, and 1994 and historical aerial photographs from 1963, 1973, 1983, 2003, 2008, and 2013 were obtained and reviewed to determine past land uses on and nearby the site. Exhibits 1 through 11 are reproductions of these maps and photographs. Observations made from the topographic and photographic follow:

• 1942. On the 1942 topographical map, the site appears to be an undeveloped tract of land with no structures. Southern Pacific Railroad runs along the eastern border and Lake Charles Airport is adjacent to the west of the site.

- 1955. On the 1955 topographical map, the site appears to be unchanged since the 1942 topographical map other than the a runway was added to the site that appears to be an extension of Lake Charles Air Force Base.
- 1963. On the 1963 aerial photograph, the site appears to have no structures on the site and a dirt runway appears on the northeast portion of the site.
- 1967. On the 1967 topographical map, the site appears unchanged since the 1955 topographical map other than the northern portion of the site appears to be part of the East Lake Charles Airport and one structure located near the southern portion of the site.
- <u>1973</u>. On the 1973 aerial photograph, the site appears unchanged since the 1963 aerial photograph.
- <u>1975</u>. On the 1975 topographic map, the site is shown to be unchanged since the 1967 topographical map.
- <u>1983</u>. On the 1983 aerial photograph, the site appears unchanged since the 1973 aerial photograph.
- 1994. On the 1994 topographical map, the site appears unchanged since the 1975 topographical map other than a pond shown on the northern portion of the site.
- 2003. On the 2003 aerial photograph, the site appears unchanged since the 1983 aerial photograph other than the site is shown with three ponds near the northern portion and a wooded area along the eastern and southern portions of the site.
- 2008. On the 2008 aerial photograph, the site appears unchanged from the 2003 aerial photograph other than the wooded areas along the eastern half of the site has been cleared.
- 2013. On the 2013 aerial photograph, the site appears unchanged from the 2008 aerial photograph other than the majority of the wooded areas near the southern tip of the site has been cleared.

#### 6.0 SITE RECONNAISSANCE

On May 7th, 2014, SJB's environmental specialists, performed a site reconnaissance of the subject property and its adjacent properties. All exterior portions of the site were observed by walking, and all adjacent properties were observed from the site perimeter and public roads. Selected photographs are included herein in the appendices.

## 6.1 GENERAL SITE SETTING

The site is located off of Tom Watson Road, Lake Charles, Calcasieu Parish, Louisiana. It is accessible from the southern end of Tom Watson Road. The site consists of maintained open field and/or range land that buffers the existing Chennault Airport to the east. The site is currently vacant.

# 6.2 EXTERIOR OBSERVATIONS

The site consists of a relatively flat maintained field areas that slops gradually to the east. The site appears level with the surrounding areas and consists of pasture grass species in the maintained fields. Several drainage ditches run throughout the site and three ponds used to store storm water is located on the site. It appears the eastern border of the site was being cleared and level along the adjacent railroad tracks. No odors, stressed vegetation, or stained soils were observed on the site.

# 6.2.1 HAZARDOUS SUBSTANCES AND/OR PETROLEUM PRODUCTS STORAGE AND DISPOSAL

No visible evidence of spills or releases of significant quantities of hazardous materials or petroleum products, underground storage tanks or associated piping, waste storage or disposal, pits, mounds, or dead vegetation were noted during the site inspection.

# 6.2.2 <u>HAZARDOUS AND/OR UNIDENTIFIED SUBSTANCE</u> <u>CONTAINERS</u>

No hazardous or unidentified substance containers were found during the site inspection.

# 6.2.3 ABOVE GROUND / UNDERGROUND STORAGE TANKS PCB STORAGE OR DISPOSAL

No aboveground or underground storage tanks were observed on the site during the site inspection. No indications of PCB storage, such as electrical transformers marked as containing PCB oil, or disposal were observed on the site.

#### 6.2.4 SOLID WASTE STORAGE OR DISPOSAL

Solid waste storage or disposal were observed during the site inspection. The contents of this solid waste consisted of sheet-metal, tires, steal, and aluminum. The trash pile did not appear to have any petroleum or Hazardous waste product.

## 6.2.5 AIR STACKS OR VENTS

No air stacks or vents were observed during the site inspection.

#### 6.2.6 STORM WATER DISCHARGE; PITS, PONDS, LAGOONS

Storm water appears to flow towards the eastern portion of the property. Tom Watson Road appears slightly higher than the property. No pits or lagoons were observed on the site. However, three small ponds were observed on the site. Maintenance workers informed the environmental professional during the site visit that these ponds were used to hold water for industrial use when needed.

#### 6.2.7 WATER WELLS

According to the Banks Database Report, six water wells are present on the site. Five of the six water well are plugged and abandoned and the remaining one is shown as active industrial use. The active well is owned by Chennault AFB and the inactive wells were owned by CU Police Jury.

### 6.3 INTERIOR OBSERVATIONS

There are no buildings currently existing on the site.

#### 6.4 AREA RECONNAISSANCE SURVEY

Adjacent properties were viewed for indications of activities that could impact the site. The site is bordered to the north by Tad Lock Freight and Calcasieu Parish Mosquito Control Department. The site is bordered to the east by Southern Pacific Railroad. The site is bordered to the south by vacant land and to the west by Chennault Airport runways.

Surrounding land uses near the site are identified on Figure 2.

## 7.0 PERSONAL INTERVIEWS

SJB interviewed two individuals knowledgeable of the site's condition and history. SJB interviewed Mr. Larry Henson (LED), and Mr. David Conner (SWLA) (User), Chennault Airport Representative (Owner), and Chief Chennault Airport Fire Department.

Chennault Airport, who currently owns the site, stated that they are not aware of any historical uses of the site involving hazardous materials or petroleum products. They stated that to the best of their knowledge the property has always been undeveloped grassland area that has been maintained with frequent mowing, clearing, and cattle grazing.

Mr. Larry Henson (LED), and Mr. David Conner (SWLA) who is looking to develop the property has stated that they are not aware of any environmental cleanup liens or any activity and use limitations on the site. They stated that there are no indicators that point to the presence or likely presence of contamination at the property that have been brought to their attention.

Chief Keith Murray has been with the Lake Charles Fire Department over 15 years, and he is not aware of any incidents on or near the site involving hazardous materials or petroleum products.

Records of verbal communication are in Appendix D.

## 8.0 FINDINGS AND CONCLUSIONS

#### 8.1 <u>FINDINGS</u>

SJB has performed a Phase I ESA of a ±160.0 acre tract located off of Tom Watson Road, Lake Charles, Calcasieu Parish, Louisiana. The site currently belongs to Chennault Airport. Based on historical information reviewed by SJB; there are no past uses of the site that point to the presence or likely presence of any hazardous substances or petroleum products on the property under conditions that indicate an existing release, a past release, or a material threat of a release into structures on the property or into the ground, groundwater, or surface water of the property.

Based on historical sources dating back to 1942, interviews with people knowledgeable of the site history, environmental database reviews, and a site inspection, SJB has found no potential evidence of current recognized environmental conditions and no potential evidence of historical recognized environmental conditions as defined in ASTM standard E 1527-05. Due to the long history of nearby industrial development of airport and associated facilities, some of which may have stored petroleum products, the potential for environmental impacts to the site associated with historical land uses does exist.

# 8.1.1 <u>POTENTIAL CURRENT RECOGNIZED ENVIRONMENTAL</u> <u>CONDITIONS</u>

The following potential current REC(s) were identified at the site:

• SJB identified no evidence of potential current REC(s).

# 8.1.2 <u>POTENTIAL HISTORICAL RECOGNIZED</u> <u>ENVIRONMENTAL CONDITIONS</u>

The following potential historical REC(s) were identified at the site:

• SJB identified no evidence of potential historical REC(s).

## 8.2 <u>CONCLUSIONS AND RECOMMENDATIONS</u>

SJB has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of the ASTM Standard E 1527-05 on vacant property located off of Tom Watson Road, Lake Charles, Calcasieu Parish, Louisiana, the site. Any exceptions to or deletions from this practice are described in section 2.4 of this report. This assessment revealed no evidence of potential REC(s) in connection with the property.

# 10.0 QUALIFICATIONS

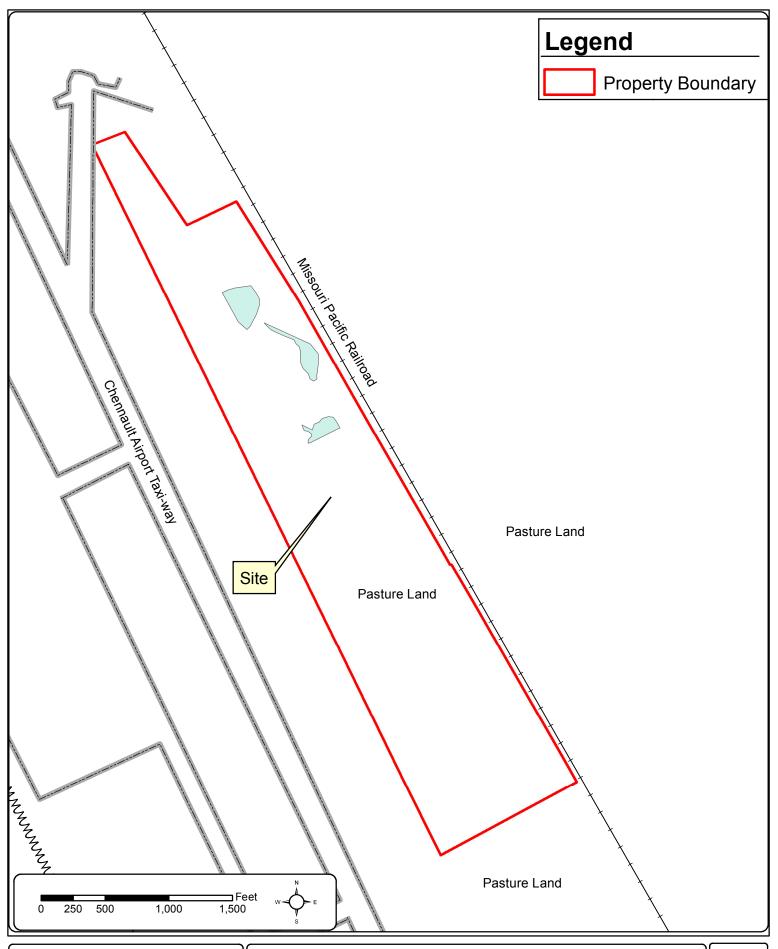

This Phase I Environmental Site Assessment was conducted by SJB Group LLC, Paul M. LeBlanc III. We declare that, to the best of our professional knowledge and believe, we meet the definition of Environmental Professional as defined in 40 CRF part 312.10. We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR part 312.

Mr. LeBlanc is an environmental scientist with ten years of experience determining environmental impacts to property. He received his Bachelor of Science degree in Fisheries from Louisiana State University in 2004. Mr. LeBlanc received academic training in the methods and theory of Phase I ESAs and has been conducting ESAs for the past 7 years.

CITY DIRECTORY REPORT		
ES-109422	February 16, 2015	

# RESEARCH PROTOCOL

Banks Environmental Data, Inc. (Banks) has completed your request for a historical tenant search for the above site. The information in this report was developed to aid the Environmental Engineer/Consultant in determining a history of previous uses of a subject property in order to help identify the likelihood of past uses having led to recognized environmental conditions in connection with a subject property as specified by ASTM 1527-05 Section 8.3. Banks has researched Haines, Coles and Polk crisscross directories back to 1940 or to the earliest year available at the Allen County Public Library in Fort Wayne, IN for any occurrences of the above address. The findings are listed in the table below.

Dear Paul,

Pursuant of your request on February 13, 2015, Banks Environmental Data, Inc. (Banks) has concluded your Historical Tenant Search for the above referenced site to be a **NEGATIVE SEARCH**. This means that Banks was unable to locate information on your site due to the reason(s) explained below.

**NO LISTING:** Banks was unable to find the streets in the search area listed in the available Lake Charles (Calcasieu Parish) LA directories.

If you have any questions or require further assistance, please contact me at 1-800-531-5255. Thank you.

Sincerely,

Misty Chase RESEARCH ANALYST

#### Soils Descriptions Chennault Tract B85

AASHTO Classification Definitions	
A-1, A-1-a, A-1-b	Granular materials (35% or less passing No. 200 sieve), sonte fragments, gravel and sand
A-2, A-2-4, A-2-5, A-2-6, A-2-7	Granular materials (35% or less passing No. 200 sieve), silty or clayey gravel and sand
A-3	Granular materials (35% or less passing No. 200 sieve), fine sand
A-4	Silt-Clay materials (more than 35% passing No. 200 sieve), silty soils
A-5	Silt-Clay materials (more than 35% passing No. 200 sieve), silty soils
A-6	Silt-Clay materials (more than 35% passing No. 200 sieve), clayey soils
A-7, A-7-5, A-7-6	Silt-Clay materials (more than 35% passing No. 200 sieve), clayey soils
A-8	Silt-Clay materials (more than 35% passing No. 200 sieve), clayey soils

Unified Classification Definitions	
СН	Fine-grained soils, silts and clays (liquid limit is 50% or more), Fat Clay
CL, CL-A (proposed), CL-K (proposed), CL-ML, CL-O (proposed), CL-T (proposed)	Fine-grained soils, silts and clays (liquid limit is less than 50%), Lean Clay
GC, GC-GM	Coarse-grained soils, Gravels, gravel with fines, Clayey Gravel
GM	Coarse-grained soils, Gravels, gravel with fines, Silty Gravel
GP, GP-GC, GP-GM	Coarse-grained soils, Gravels, clean gravels, Poorly Graded Gravel
GW, GW-GC, GW-GM	Coarse-grained soils, Gravels, clean gravels, Well-Graded Gravel
MH, MH-A, MH-K, MH-O, MH-T	Fine-grained soils, silts and clays (liquid limit is 50% or more), Elastic Silt
ML, ML-A (proposed), ML-K (proposed), ML-O (proposed), ML-T (proposed)	Fine-grained soils, silts and clays (liquid limit is less than 50%), Silt
OH, OH-T (proposed)	Fine-grained soils, silts and clays (liquid limit is 50% or more), Organic Clay or Organic Silt
OL	Fine-grained soils, silts and clays (liquid limit is less than 50%), Organic Clay or Organic Silt
PT	Highly organic soils, Peat
SC, SC-SM	Coarse-grained soils, Sands, sands with fines, Clayey Sand
SM	Coarse-grained soils, Sands, sands with fines, Silty Sand
SP, SP-SC, SP-SM	Coarse-grained soils, Sands, clean sands, Poorly Graded Sand
SW, SW-SC, SW-SM	Coarse-grained soils, Sands, clean sands, Well-Graded Sand

Dataset	Source	Dataset Description	Update Schedule	Data Requested	Data Obtained	Data Updated	Source Updated
NPL National Priority List	EPA	NPL is the list of high priority hazardous waste sites in the United States eligible for long-term remedial action financed under the federal Superfund program and CERCLIS. Also known as Superfund sites, the EPA will only add sites to the NPL list based upon completion of the Hazard Ranking System (HRS) screening, public solicitation of comments about the proposed site, and after all comments have been addressed.	Quarterly	01/18/2014	11/05/2013	11/05/2013	10/25/2013
DNPL Delisted National Priority List	EPA	DNPL is a list of all sites that have been deleted from the EPA NPL list. These sites are taken off the NPL list usually due to no further response or remedial action being required on them. Notices to delete NPL sites are published in the Federal Register and become effective unless the EPA receives significant adverse or critical comments during the 30-day public comment period.	Quarterly	01/18/2014	11/05/2013	11/05/2013	10/25/2013
CER CERCLIS	EPA	CERCLIS sites come from the Comprehensive Environmental Response, Compensation, and Liability Act, a federal law designed to clean up abandoned hazardous waste sites. These sites are either proposed, listed or under review currently to be a part of the National Priority List.	Quarterly	01/18/2014	11/05/2013	11/05/2013	10/25/2013
CER NFRAP CERCLIS NFRAP	EPA	CERCLIS sites designated 'No Further Remedial Action Planned' NFRAP have been removed from CERCLIS. NFRAP sites may be sites where, following an initial investigation, no contamination was found, contamination was removed quickly without the site being placed on the NPL, or the contamination was not serious enough to require Federal Superfund action or NPL consideration.	Quarterly	01/18/2014	11/05/2013	11/05/2013	10/25/2013
RCRA COR RCRA CORRACTS	EPA	These sites are registered hazardous waste generators or handlers that fall under the Resource Conservation and Recovery Act (RCRA) and subject to corrective action activity.	Quarterly	11/19/2013	11/19/2013	11/19/2013	11/14/2013
RCRA TSD RCRA non-CORRACTS TSD	EPA	This database lists all treatment, storage and disposal of hazardous material sites that fall under the Resource Conservation and Recovery Act (RCRA). All hazardous waste TSD facilities are required to notify EPA of their existence.	Quarterly	11/19/2013	11/19/2013	11/19/2013	11/14/2013
RCRA GEN RCRA Generators	EPA	The EPA regulates all Hazardous Waste Generators subject to the Resource Conservation and Recovery Act (RCRA). They are classified by the quantity of hazardous waste generated. A Small Quantity Generator (SQG) generates between 100kg and 1,000 kg of waste per month. A Large Quantity Generator (LQG) generates over 1,000 kg of waste per month. A Conditionally Exempt SQG (CEG) generates less than 100 kg of waste per month.	Quarterly	11/19/2013	11/19/2013	11/19/2013	11/14/2013
FED BWN Federal Brownfields	ЕРА	A listing of sites that assist the EPA in collecting, tracking, and updating information of sites in relation to the Small Business Liability Relief and Brownfields Revitalization Act. These sites are real property that is either abandoned or underutilized where redevelopment or expansion is complicated by real or perceived environmental contamination.	Quarterly	02/10/2014	02/10/2014	02/11/2014	01/31/2014
FED IC Federal Institutional Control	EPA	This is a listing of Brownfield Management System (BMS) sites that have had Institutional Controls (ICs) placed on them. ICs are administrative restrictions, such as legal controls, that help minimize the potential for human exposure to known contamination by ensuring appropriate land or resource use. ICs are meant to supplement Engineering Controls and will rarely be the sole remedy at a site. ICs are a type of Activity and Use Limitation (AUL).	Quarterly	02/10/2014	02/10/2014	02/11/2014	01/31/2014
FED EC Federal Engineering Control	ЕРА	This is a listing of Brownfield Management System (BMS) sites that have had Engineering Controls (ECs) placed on them. ECs are physical methods or modifications put into place on a site to reduce or eliminate the possibility of human exposure to known contamination. ECs are a type of Activity and Use Limitation (AUL).	Quarterly	02/10/2014	02/10/2014	02/11/2014	01/31/2014

Dataset	Source	Dataset Description	Update Schedule	Data Requested	Data Obtained	Data Updated	Source Updated
ERNS ERNS List	EPA/National Response Center	ERNS is a national database used to store information on unauthorized releases of oil and hazardous substances that have been reported to the National Response Center since 2001. The NRC is the sole federal point of contact for reporting oil and chemical spills. Prior to 2001 this information was maintained by the EPA.	Annually	01/11/2014	01/18/2013	01/18/2013	12/31/2012
ST NPL State/Tribal Equivalent NPL	LADEQ	This database contains 2 different types of records of hazardous properties in Louisiana that are considered or have already been through remediation. A confirmed status denotes that assessments have been performed and a determination made that (1) hazardous waste or substances are present at the site and (2) these sites are under the jurisdiction of the lnactive and Abandoned Sites regulations. A potential status is an indicator that sites are either waiting to be assessed or the assessment (investigation) is in progress.	Quarterly	12/30/2013	01/03/2014	01/03/2014	11/15/2013
ST CER State/Tribal Equivalent CERCLIS	NA	This database is not currently available from this state. If this state does make this database available in the future, Banks Environmental Data will obtain it for reporting purposes.	NA	N/A	N/A	N/A	N/A
SWLF State/Tribal Disposal or Landfill	LADEQ	This database contains listings of all Type I, Type II, Type III C&D solid waste landfills registered with the Solid Waste Program for the state of Louisiana.	Quarterly	11/19/2013	11/19/2013	11/19/2013	11/19/2013
LPST State/Tribal Leaking Storage Tank	LADEQ	This database is a list of all known leaking underground storage tanks as registered with the Remediation Services Division of the LDEQ. The Louisiana Department of Environmental Quality (LDEQ) migrated all environmental data to a new system in 1999. The old system consisted of many different databases with different formats to collect various types of data. The new system is now the primary tool used to track, collect and pull reports from DEQ data. After the migration took place the old database was locked and is no longer accessible. Prior to 1999 LDEQ reported LUSTs as individual instances of actual leaks. The new database reports LUSTs as tanks currently in remediation. Once a facility leak is evaluated and the remediation is closed, the site is no longer considered a 'LUST'. However, Banks will continue to report these sites as a LUST in the Regulatory Report.	Quarterly	12/30/2013	01/06/2014	01/06/2014	01/06/2014
LPST State/Tribal Leaking Storage Tank	EPA	The Tribal LUST database (maintained by EPA Region 6) provides information on leaking underground storage tank on tribal lands in Louisiana, Arkansas, Oklahoma, New Mexico and Tribal Nations.	Quarterly	12/30/2013	01/16/2014	01/20/2014	01/13/2014
PST State/Tribal Storage Tank	LADEQ	This database is a list of all known underground and aboveground storage tanks registered with the Remediation Services Division of the LDEQ.	Quarterly	12/30/2013	01/03/2014	01/03/2014	01/03/2014
PST State/Tribal Storage Tank	EPA	The Tribal UST database (maintained by EPA Region 6) provides underground storage tank information on tribal lands in Louisiana, Arkansas, Oklahoma, New Mexico and Tribal Nations.	Quarterly	12/30/2013	01/16/2014	01/20/2014	01/13/2014
ST IC State/Tribal Institutional Control	LADEQ	This database contains state Voluntary Cleanup Program sites that have an Institutional Control (ICs) placed on them. ICs are administrative restrictions, such as legal controls, that help minimize the potential for human exposure to known contamination by ensuring appropriate land or resource use.	Quarterly	12/30/2013	01/03/2014	01/03/2014	01/02/2014
ST EC State/Tribal Engineering Control	LADEQ	This database contains state Voluntary Cleanup Program sites that have Engineering Controls (ECs) placed on them. ECs are physical methods or modifications put into place on a site to reduce or eliminate the possibility of human exposure to known contamination. #### Disclaimer Chennault Tract B85

The Banks Environmental Data Regulatory Database Report was prepared based upon data obtained from State, Tribal, and Federal sources known to Banks Environmental Data at the time the data was obtained. Great care has been taken by Banks in obtaining the best available data from the best available sources. However, there is a possibility that there are sources of data applicable or pertaining to this report's target property, and/or surrounding properties, to which Banks does not have access or has not accessed. Furthermore, although Banks Environmental Data performs quality assurance and quality control on all data, including data it obtains. Banks recognizes that inaccuracies in data from these sources may, and do exist; accordingly, inaccurate data may have been used or relied upon in the preparation of this report. Even though Banks Environmental Data performs a thorough and diligent search to locate and fix any inaccuracies in the data relied upon in the preparation of this report, Banks cannot guarantee or warrant the accuracy of the locations, information, data, or report. The purchaser of this report accepts this report "as is" and assumes all risk related to any potential in accuracy contained in the report or not reported in it, whether due to a reliance by Banks Environmental Data on inaccurate data, or for any other reason [including but not limited to the negligence or express negligence of Banks Environmental Data]. If this report is being used for the Records Review section of a Phase I Site Assessment according to the ASTM 1527-13, for EPA's All Appropriate Inquiry, or for any other purpose (public or private), all liability and responsibility is assumed by the Environmental Professional or other individual or entity acquiring the report.
