Jon,

I can't provide the exact location of the fiber cable, but if fiber is needed for the customer it would be provided from Hwy 1. Any service your client would want is available in that area.

Some examples are:

POTS
DSL
T1
DS3
Metro Ethernet
Wavelength
Lightgate
SMARTRing

I hope this gives you the information you need.

Thanks

Sorry for the slow response. Been in court all week. Attached you will find layout of the eastside of the Airpark. Site is crudely drawn in. It's next to Union Tank Car. Call me if any questions.

Do you have a map that shows the exact location so I can see what access there is?
