RE: Broadband Service Availability

Dear Mr. Breedlove:

Per our conversation regarding the tract of land located on the East side of LA HWY 486 approximately 1.4 miles north from the intersection of LA HWY 6 and LA HWY 486, we have assessed the services available at this location.

CP-TEL has constructed fiber optic facilities in this area as part of a fiber-to-the-premises expansion project. These services are available at any location on LA HWY 486 between Campti and Grand Ecore, but specifically the location defined in the preceding paragraph has the following services available from CP-TEL:

- 10Mb/s – 100Mb/s Internet and Metro Ethernet Services
- Dark Fiber leasing for 1Gb/s to 10Gb/s broadband services
- POTS and VoIP telephone service
- Analog and Digital Cable TV

These services are available today without the need for substantial construction of additional facilities. Normal installation fees of no more than \$1500 would apply if service is requested at this location.

Please contact me with any additional questions at 318-352-0014.

Sincerely,

Philip Fernbaugh
President
