

Monroe Regional Airport

5400 Operations Road
Monroe, Louisiana 71203

March 8, 2012

To whom this May Concerns:

The property known as Millhaven Plantation is approximately 13,000 linear feet from the nearest point of the runways at the Monroe Regional Airport. Under general FAA regulations, a structure may be one (1) foot tall for each 100 feet of distance from the nearest runway.

However, regardless of the distance from any runway, any structure in excess of 200 feet above ground level must be permitted with an FAA air space study.

Sincerely,

Ron Phillips

Ron Phillips, Interim Airport Director
Monroe Regional Airport
