December 18, 2012

Mr. Tommy Maddie  
Chairman, Avoyelles Parish Port Commission  
P. O. Box 127  
Simmesport, LA 71369

Dear Tommy:

The electrical infrastructure at the Avoyelles Parish Port is readily available and easily completed. There is a sub-transmission 34.5 KV line located on the property. This line is connected to substations about four miles northwest of the property.

This three-phase line has significant capacity for your industrial needs.

We look forward to working with you to develop this property to locate a new industrial tenant.

If there is anything I can do to assist you, please feel free to call.

Sincerely,

A handwritten signature in black ink, appearing to read "Mike Sibley". The signature is fluid and cursive, with a large, sweeping flourish at the end.

Mike Sibley  
Senior Business Developer
