- General Notes:
1. No attempt has been made by CSRS, Inc. to verify site boundary, title, actual legal ownership, deed restrictions, servitudes, easements, or other burdens on the property, other than that furnished by the client or his representative.
  2. Transportation data from 2013 TIGER datasets via U.S. Census Bureau at <ftp://ftp2.census.gov/geo/tiger/TIGER2013>.
  3. Utility information from visual inspection and/or the individual utility operators. Exact field location has not been determined by survey. The lines shown are an approximate representation only and may have been offset for depiction purposes.
  4. 2015 aerial imagery from USDA-APFO National Agricultural Inventory Project (NAIP) and may not reflect current ground conditions.
  5. Proposed natural gas upgrade shown is for representational purposes only, depicting the intent of the cost estimate provided with this exhibit to meet LED minimum requirements, and is subject to revision.

Re. Harvey Site Natural Gas Distribution Service Line  
CSRS Job No. 212161

Dear Mr. Richardson:

According to local utility officials, the Harvey site located in West Feliciana Parish, Louisiana does not have access to an existing natural gas distribution line to service the site. Two natural gas transmission lines owned by Enbridge, Inc and operated by Enbridge, Inc exist on site and may be available for natural gas access.

In order to provide a natural gas supply, the site would require the construction of a tapping station to tie in to one of the Enbridge, Inc transmission gas lines. The construction cost of a proposed natural gas tapping station and is \$480,000. This cost can vary due to site pad location, crossing of any wetlands or roadways and line depths. Permission would have to be granted from Enbridge, Inc to tie in to their transmission line.

Please note this estimate does not include engineering, required rights of way, environmental impacts, or operation and maintenance costs. This cost estimate was prepared with the best information available at the time of certification. The actual costs can vary based on the availability of material, site conditions and labor availability. This plan can be executed within a reasonable timetable of 180 days or less based on preliminary engineering judgment.

Thank you for the opportunity to assist you in this project. Should you have any questions or require additional information, feel free to contact me.

Sincerely,

CSRS, Inc.

Taylor M. Gravois, PE, PLS
