

GENERAL NOTES

Contractor shall verify all elevations and dimensions, and shall check all elevations for drainage of surface water before starting work. Site shall be graded to slope uniformly between new grades indicated, and from new grades to existing at lines noted on plan or details showing limits of grading. All ramps shall be 15'-0" wide and centered on doors. Provide expansion joints where ramps abut buildings and contraction joints where ramps abut conc. aprons. Reinforce concrete ramps and aprons with steel fabric 6"x6" 4/4. See S.D. 6-2-8 B for joints in concrete aprons and ramps. Installation of spur tracks and culverts under tracks not in contract, but grading adjacent to tracks in the contract. Concrete walks to be 4" thick and top to be 1" above finished grade unless otherwise noted.

0.00 New elevation or grade
 0.00 Existing elevation or grade
