

Exhibit K. New Roads Industrial Park Electricity Infrastructure Upgrade Plan

6. Construction Cost Estimate:

The cost estimate for constructing 640 feet of 13.2 kV line is \$25,000.00.

Construction Plan:

The City of New Roads will utilize its own workforce to construct the 640 feet of three phase 13.2 kV electric line extension. This line extension will take approximately one week to build. The City has the necessary materials and construction details in house to complete this project.
