Re: North Webster Parish Industrial District
Site Development

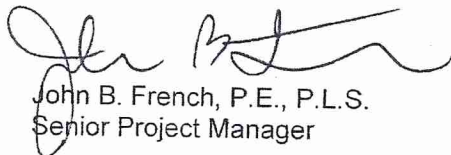

Dear Ms. Breaux:

The North Webster Parish Industrial District is proposing site development of the existing property shown on the attachments. The project consists of marketing for future development of industrial use, the existing 61.329 acres owned by the District. The exact extent of the future development is not known at this time, it will be dependent on the type of industry. Enclosed is the project location map and a delineated aerial of the property to be developed.

In order to determine the cultural and environmental impact of the proposed project on threatened and endangered species, wetlands and cultural resources, we respectfully request your review of this project in order to determine the cultural and environmental impact of the proposed project.

Please respond in writing to this address or email at jfrench@ksaalliance.com. If you have questions or need additional information please contact me.

Sincerely,

John B. French, P.E., P.L.S.
Senior Project Manager
