Mr. Russell Richardson Baton Rouge Area Chamber 564 Laurel Street Baton Rouge, LA 70801

Subject: Phase I Environmental Site Assessment

Syngenta Site Highway 75

Iberville Parish, Louisiana 70721 Chenier Project No. 19-131

Dear Mr. Richardson:

Chenier Environmental Consulting, LLC (Chenier) is pleased to provide the results of the *Phase I Environmental Site Assessment* (Phase I ESA) report of the abovementioned address (the "subject property"). This assessment was performed in conformance with the scope and limitations as detailed in the ASTM Practice E1527-13 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process

This assessment included a site reconnaissance as well as research and interviews with representatives of the public, property ownership, site manager, and regulatory agencies. An assessment was made, conclusions stated, and recommendations outlined.

We appreciate the opportunity to assist you with this project. If you have any questions concerning this report, or if we can assist you in any other matter, please contact me at (225) 235-9557.

Sincerely,

Aaron S. Bass, PhD

Clavon Bare

EXECUTIVE SUMMARY

Chenier Environmental Consulting, LLC. (Chenier) has performed a Phase I Environmental Site Assessment (ESA) in accordance with the scope of work and limitations of ASTM Standard Practice E1527-13, the Environmental Protection Agency Standards and Practices for All Appropriate Inquiries (AAI) (40 CFR Part 312) and set forth by Baton Rouge Chamber for the property located off Highway 75 near Carville in Iberville Parish, Louisiana (the "subject property"). The Phase I Environmental Site Assessment is designed to provide the Baton Rouge Chamber with an assessment concerning environmental conditions (limited to those issues identified in the report) as they exist at the subject property.

Property Description

The subject property is located on the east bank of the Mississippi River off Highway 75 (Point Clair Road) in Iberville Parish, Louisiana. It is situated on both the north and south sides of Highway 75 and is approximately one-mile west Highway 3115 and 0.75 miles east of the town of Carville. Please refer to the table below for further description of the subject property:

Subject Property Data

Address(es): Highway 75, Iberville Parish, Louisiana

Property Use: Pastureland (cattle grazing)

Land Acreage (Ac): +/- 656 Ac

Number of Buildings: 0

Date of Construction: Not applicable

Assessor's Parcel Number Parcels 0510638885, 0500639001, and 0500639001

(APN):

Type of Construction: Not applicable

Current Tenants: Syngenta Crop Protection, Inc.
Site Assessment Performed By: Aaron S. Bass of Chenier

Site Assessment Conducted On: November 5, 2019

The subject property is currently pasture and forested land. There are no current onsite operations other than cattle grazing on the property. Numerous pipelines cross and border the property and a natural gas pipeline building is located near the northeast corner of the property. The property is surrounded by a barbed-wire fence on the north, south and west. A chain-link fence runs along the eastern boundary.

According to available historical sources, the subject property has been primarily agricultural land (pasture) and forest since as early as 1936. There appear to have been were several residences at the front of the property along Highway 75 from at least the late 1930s to the early 1970s. Remnants of one of these residences include a water well, underground septic tank and buried butane tank near the southeast corner of the property. No evidence of historical cemeteries or churches were observed during the site reconnaissance or review of historical information.

The immediately surrounding properties consist of forested land across railroad tracts to the north; the Mississippi River to the south; Total Carville Polystyrene Plant to the east; and Hercules Transport Company and forested land to the west. The surrounding properties also appeared to have had scattered residences along Highway 75 and have historically been pasture prior to the current industrial developments.

According to data from USGS Louisiana Water Science Center monitoring well (#08070202) the depth to groundwater in the vicinity of the subject property is inferred to be approximately 10.5 feet below ground surface (bgs) and groundwater flow is inferred to be toward the south.

Findings

A recognized environmental condition (REC) refers to the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: due to release to the environment; under conditions indicative of a release to the environment; or under conditions that pose a material threat of a future release to the environment. The following was identified during the course of this assessment:

 Chenier did not identify any recognized environmental conditions during the course of this assessment.

A controlled recognized environmental condition (CREC) refers to a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls. The following was identified during the course of this assessment:

Chenier did not identify any controlled recognized environmental conditions during the course of this assessment.

A historical recognized environmental condition (HREC) refers to a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls. The following was identified during the course of this assessment:

Chenier did not identify any historical recognized environmental conditions during the course of this assessment

An environmental issue refers to environmental concerns identified by Chenier, which do not qualify as RECs; however, warrant further discussion. The following was identified during the course of this assessment:

Chenier did not identify any environmental issues during this assessment except for the presence of an underground butane tank. Chenier recommends that a qualified contractor be used to identify and remove butane tank prior to property development.

Conclusions, Opinions and Recommendations

Chenier has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-13 of Highway 75 near Carville, Iberville Parish, Louisiana (the "subject property"). Any exceptions to, or deletions from, this practice are described in Section 1.5 of this report.

This assessment has revealed no evidence of recognized environmental conditions in connection with the subject property. No environmental issues were identified in connection with the subject property except for the presence of an underground butane tank near the southeast corner of the property. Chenier

recommends that a qualified contractor be used to identify and remove the butane tank prior to sidevelopment. Based on the conclusions of this assessment, Chenier recommends no further investigation of the subject property at this time.

1.0 INTRODUCTION

Chenier Environmental Consulting, LLC (Chenier) has performed a Phase I Environmental Site Assessment (ESA) in conformance with the scope and limitations of ASTM Standard Practice E1527-13 and the Environmental Protection Agency Standards and Practices for All Appropriate Inquiries (AAI) (40 CFR Part 312) for the property located off Highway 75 near Carville, Iberville Parish, Louisiana (the "subject property"). Any exceptions to, or deletions from, this scope of work are described in the report.

1.1 Purpose

The purpose of this ESA is to identify existing or potential Recognized Environmental Conditions (as defined by ASTM Standard E1527-13) affecting the subject property that: 1) constitute or result in a material violation or a potential material violation of any applicable environmental law; 2) impose any material constraints on the operation of the subject property or require a material change in the use thereof; 3) require clean-up, remedial action or other response with respect to Hazardous Substances or Petroleum Products on or affecting the subject property under any applicable environmental law; 4) may affect the value of the subject property; and 5) may require specific actions to be performed with regard to such conditions and circumstances. The information contained in the ESA Report will be used by Client to: 1) evaluate its legal and financial liabilities for transactions related to foreclosure, purchase, sale, loan origination, loan workout or seller financing; 2) evaluate the subject property's overall development potential, the associated market value and the impact of applicable laws that restrict financial and other types of assistance for the future development of the subject property; and/or 3) determine whether specific actions are required to be performed prior to the foreclosure, purchase, sale, loan origination, loan workout or seller financing of the subject property.

This ESA was performed to permit the *User* to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on scope of Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) (42 U.S.C. §9601) liability (hereinafter, the "*landowner liability protections*," or "*LLPs*"). ASTM Standard E1527-13 constitutes "*all appropriate inquiry* into the previous ownership and uses of the *property* consistent with good commercial or customary practice" as defined at 42 U.S.C. §9601(35)(B).

1.2 Scope of Work

The scope of work for this ESA is in accordance with the requirements of ASTM Standard E1527-13. This assessment included: 1) a property and adjacent site reconnaissance; 2) interviews with key personnel; 3) a review of historical sources; 4) a review of regulatory agency records; and 5) a review of a regulatory database report provided by a third-party vendor. Chenier contacted local agencies, such as environmental health departments, fire departments and building departments in order to determine any current and/or former hazardous substances usage, storage and/or releases of hazardous substances on the subject property. Additionally, Chenier researched information on the presence of activity and use limitations (AULs) at these agencies. As defined by ASTM E1527-13, AULs are the legal or physical restrictions or limitations on the use of, or access to, a site or facility: 1) to reduce or eliminate potential exposure to hazardous substances or petroleum products in the soil or groundwater on the subject property; or 2) to prevent activities that could interfere with the effectiveness of a response action, in order to ensure maintenance of a condition of no significant risk to public health or the environment. These legal or physical restrictions, which may include institutional and/or engineering controls (IC/ECs),

are intended to prevent adverse impacts to individuals or populations that may be exposed to hazardous substances and petroleum products in the soil or groundwater on the property.

If requested by Client, this report may also include the identification, discussion of, and/or limited sampling of asbestos-containing materials (ACMs), lead-based paint (LBP), mold, and/or radon.

1.3 Limitations

Chenier warrants that the findings and conclusions contained herein were accomplished in accordance with the methodologies set forth in the Scope of Work. These methodologies are described as representing good commercial and customary practice for conducting an ESA of a property for the purpose of identifying recognized environmental conditions. There is a possibility that even with the proper application of these methodologies there may exist on the subject property conditions that could not be identified within the scope of the assessment or which were not reasonably identifiable from the available information. Chenier believes that the information obtained from the record review and the interviews concerning the subject property is reliable. However, Chenier cannot and does not warrant or guarantee that the information provided by these other sources is accurate or complete. The conclusions and findings set forth in this report are strictly limited in time and scope to the date of the evaluations. The conclusions presented in the report are based solely on the services described therein, and not on scientific tasks or procedures beyond the scope of agreed-upon services or the time and budgeting restraints imposed by the Client. No other warranties are implied or expressed.

Some of the information provided in this report is based upon personal interviews, and research of available documents, records, and maps held by the appropriate government and private agencies. This report is subject to the limitations of historical documentation, availability, and accuracy of pertinent records, and the personal recollections of those persons contacted.

This practice does not address requirements of any state or local laws or of any federal laws other than the all appropriate inquiry provisions of the LLPs. Further, this report does not intend to address all of the safety concerns, if any, associated with the subject property.

Environmental concerns, which are beyond the scope of a Phase I ESA as defined by ASTM include the following: ACMs, LBP, radon, and lead in drinking water. These issues may affect environmental risk at the subject property and may warrant discussion and/or assessment; however, are considered non-scope issues. If specifically requested by the Client, these non-scope issues are discussed in Section 6.3.

1.4 User Reliance

The Baton Rouge Area Chamber (BRAC) engaged Chenier to perform this assessment in accordance with an agreement governing the nature, scope and purpose of the work as well as other matters critical to the engagement. All reports, both verbal and written, are for the sole use and benefit of BRAC. Either verbally or in writing, third parties may come into possession of this report or all or part of the information generated as a result of this work. In the absence of a written agreement with Chenier granting such rights, no third parties shall have rights of recourse or recovery whatsoever under any course of action against Chenier, its officers, employees, vendors, successors or assigns. Any such unauthorized user shall be responsible to protect, indemnify and hold Chenier, Client and their respective officers, employees, vendors, successors and assigns harmless from any and all claims, damages, losses, liabilities, expenses (including reasonable attorneys' fees) and costs attributable to such Use. Unauthorized use of this report shall constitute acceptance of and commitment to these responsibilities,

which shall be irrevocable and shall apply regardless of the cause of action or legal theory pled or asserted. Additional legal penalties may apply.

Limiting Conditions 1.5

The findings and conclusions contain all the limitations inherent in these methodologies that are referred to in ASTM E1527-13.

Specific limitations and exceptions to this ESA are more specifically set forth below:

• Except for property tax files and recorded land title records, which were not considered to be sufficiently useful, Chenier reviewed all standard historical sources and conducted appropriate interviews.

Due to time constraints associated with this report, the Client has requested the report despite the above-listed limitations.

2.0 SITE DESCRIPTION

2.1 Site Location and Legal Description

The subject property includes approximately 656 acres of pastureland and forest located on the east bank of the Mississippi River off Highway 75 (Point Clair Road) near the town of Carville in Iberville Parish, Louisiana. It is situated on both the north and south sides of Highway 75 and is approximately one-mile west Highway 3115 and 0.75 miles east of the town of Carville. According to the Iberville Tax Assessor, the subject property includes Parcels 0510638885, 0500639001, and 0500639001. and is owned by Syngenta Crop Protection, Inc. (Syngenta) since 2011. The legal descriptions are included in Appendix B.

Please refer to Figure 1: Site Location Map, Figure 2: Site Plan, Figure 3: Topographic Map, and Appendix A: Site Photographs for the location and site characteristics of the subject property.

2.2 Current Property Use

The subject property is currently pasture and forested land. There are no current onsite operations other than cattle grazing. Numerous pipelines cross the property and a pipeline metering station is located near the northeast corner of the property. The subject property is zoned Heavy Industrial by the City of St. Gabriel.

The subject property was not identified in the regulatory database report of Section 4.2.

2.3 Current Use of Adjacent Properties

The subject property is located within a rural/industrial area of Iberville Parish. During the vicinity reconnaissance, Chenier observed the following land use on properties in the immediate vicinity of the subject property:

Immediately Surrounding Properties

North: Canadian National Railway and rail spur then forested land

South: Mississippi River

East: Total Carville Polystyrene Plant
West: Hercules Transport and forested land

The adjacent property to the east at 6225 LA 75, Total Carville Polystyrene Plant, is identified as a RCRA-LQG and EPA Watch List site. Additionally, Total Petrochemicals and Refining USA, Inc – COS Mar at 6325 Highway 75, is identified as a Deleted State Hazardous Waste Site (DEL SHWS), Air Permit Site (AIRS), National Pollutant Discharge Elimination System (NPDES), ASBESTOS, and Remediation (REM) site.

2.4 Physical Setting Sources

2.4.1 Topography

The United States Geological Survey (USGS) *Carville, Louisiana* Quadrangle 7.5-minute series topographic map was reviewed for this ESA. According to the contour lines on the topographic map, the subject property is located at approximately 16 feet above mean sea level (MSL). The contour lines in the area of the subject property indicate the area is sloping gently toward the north. The subject property is depicted on the 2012 map as undeveloped

A copy of the most recent topographic map is included as Figure 3 of this report.

2.4.2 Hydrology

According to topographic map interpretation, the direction of groundwater flow in the vicinity of the subject property is inferred to be toward the north. Bayou Braud is the nearest surface water in the vicinity and traverses the middle of the subject property and the Mississippi River borders the subject property to the south.

According to available information, a public water system operated by the Iberville Parish Utility Department serves the subject property vicinity and purchases water from the Baton Rouge Water Company. The sources of public water for Iberville Parish are groundwater from South Hills Aquifer.

Based on data from USGS Louisiana Water Science Center monitoring well (#08070202) installed approximately 0.50-1.00-mile east of the property, the depth to groundwater in the vicinity of the subject property is inferred to be approximately 10.5 feet below ground surface (bgs).

2.4.3 Geology/Soils

The subject property is situated within the Intermediate Terraces of the Coastal Plain physiographic province of the State of Louisiana. Underlying soils are of Quaternary age and consist gray and brown silt, silty clay, and some very fine sand.

Based on information obtained from the USDA Natural Resources Conservation Service Web Soil Survey online database, the subject property is mapped as Vacherie silt (Va), Sharkey clay (Sg), Gramercy silty clay loam (Gr), Cancienne silt (Ca), Carville soils (Cg). The Vacherie series consists of deep, somewhat poorly drained, very slowly permeable soils that formed in silty and clayey alluvium. These soils are on nearly level to very gently sloping flood plains of the Mississippi River. Slopes range from 0 to 3 percent.

The Sharkey series consists of very deep, poorly and very poorly drained, very slowly permeable soils that formed in clayey alluvium. These soils are on flood plains and low terraces of the Mississippi River. Slope is ranges from 1 to 5 percent.

The Gramercy series consists of very deep, poorly drained, very slowly permeable soils that formed in clayey over fine-silty alluvium. These soils are on alluvial flats and on the lower parts of natural levees on the alluvial plain of the Mississippi River and its distributaries. Slope is dominantly less than 0.5 percent but ranges to 3 percent.

The Cancienne series consists of very deep, level to gently undulating, somewhat poorly drained mineral soils that are moderately slowly permeable. These soils formed in loamy and clayey alluvium. They are on high and intermediate positions on natural levees and deltaic fans of the Mississippi River and its distributaries. Slopes range from 0 to 3 percent.

The Carville series consists of very deep, somewhat poorly drained, moderately permeable soils that formed in recent loamy alluvium. These soils are on nearly level to very gently sloping natural levee positions on flood plains, mainly along the Mississippi River and its distributaries. Slopes range from 0 to 2 percent.

2.4.4 Flood Zone Information

Chenier performed a review of the Flood Insurance Rate Map, published by the Federal Emergency Management Agency. According to Community Panel Number 22047C0355D, dated November 06, 2013, the northern portion of the subject property appears to be in Zone A and the southern portion of the subject property appears to be located in Zone X. Zone A is an area subject to inundation by the 1-percent-annual-chance flood event. Zone X is an area located outside of the 100-year and 500-year flood plains.

A copy of the reviewed flood map is not included in Appendix B of this report.

3.0 HISTORICAL INFORMATION

Chenier obtained historical use information about the subject property from a variety of sources. A chronological listing of the historical data found is summarized in the table below:

Historical Use Information							
Period/Date	Source				Description/Use		
1936-1970	Aerial	Photographs,	City	Directories,	Undeveloped/ Residential in the south		
	Interviev	ws, Topographic	Maps				
1971-Present	Aerial	Photographs,	City	Directories	Undeveloped		
	Sanborn	, Interviews, Top	ographi	c Maps	•		

No potential environmental concerns were identified in association with the current or former use of the subject property

3.1 Aerial Photograph Review

Chenier obtained available aerial photographs of the subject property and surrounding area from Environmental Data Resources (EDR) on October 14, 2019. The following was observed on the subject property and adjacent properties during the aerial photograph review:

Date: 1973	Scale: 1"=1000'
Subject Property:	Appears to be primarily pasture with forested land to the north. A utility line right-of-way crosses the northern part of the property. Structures are visible near the southwest and southeast corners of the property.
North:	Railroad tracks then fields and forested land
South:	Mississippi River
East: West:	Appears to be agricultural land and forested batture land Appears to be agricultural land with a residence along LA 75

Date: 1983, 1	1989, 1994	Scale:	1"=1000'
Subject Property:	No significant changes visible except for a road on or ne	ear the easter	n boundary of
	the property leading to a pipeline building near the north	east corner of	of the property

the property leading to a pipeline building near the northeast corner of the property south of Bayou Braud and a pipeline corridor oriented east west at that location.

North: Industrial development and roads then forested land

South: No significant changes visible

East: Pasture then an industrial plant (Total Petrochemicals USA)

West: No significant changes visible

Date: 1998 Scale: 1"=1000'

Subject Property: No significant changes visible North: No significant changes visible South: No significant changes visible

East: Continued expansion of industrial development

West: No significant changes visible

Date: 2004 Scale: 1"=100'0

Subject Property: No significant changes visible **North:** No significant changes visible **South:** No significant changes visible

East: Continued industrial development including a rail spur along the eastern boundary

Date: 2004 Scale: 1"=100'0

(Total Carville Polystyrene) No significant changes visible

Date: 2005 Scale: 1"=1000'

Subject Property: No significant changes visible North: No significant changes visible South: No significant changes visible East: No significant changes visible

West: Appears to be residential structures along LA 75 then industrial development that

appears to be the current Bear Industries C&D Landfill

Date: 2007, 2010, 2013, 2017 Scale: 1"=1000"

Subject Property: No significant changes visible North: No significant changes visible No significant changes visible East: No significant changes visible West: No significant changes visible

Copies of select aerial photographs are included in Appendix B of this report.

3.2 Fire Insurance Maps

West:

Chenier reviewed the collection of Sanborn Fire insurance maps from Environmental Data Resources (EDR) on October 14, 2019. Sanborn map coverage was not available for the subject property.

Copies of reviewed Sanborn Maps are included in Appendix B of this report.

3.3 City Directories

Chenier reviewed historical city directories obtained from Environmental Data Resources (EDR) on November 11, 2019 for past names and businesses that were listed for the subject property and adjacent properties. The findings are presented in the following table:

Based on the city directory review, no environmentally sensitive listings were identified for the subject property.

According to the city directory review, the adjacent properties have been occupied by Bear Industries, LLC (5981 LA-75); Fina Oil (6225 LA-75); United States Postal Service (5715 LA-75); and Cos-Mar Inc (6325 LA-75).

Copies of reviewed city directories are included in Appendix B of this report.

3.4 Historical Topographic Maps

Chenier reviewed historical topographic maps obtained from Environmental Data Resources (EDR) on October 14, 2019. The following was observed on the subject property and adjacent properties during the topographic map review:

Date: 1936

Subject Property: Appears to be undeveloped forested land to the north and agricultural land to the south

with six buildings along LA 75

North: Railroad track border the northeast corner of the subject property; an unimproved

road and building to the northwest

South: Mississippi River

East: Appears to be primarily agricultural land with nine buildings clustered along an

unimproved road bordering the subject property in the southeast corner; railroad

track in northeast corner

West: Appears to be primarily agricultural land with eight buildings clustered along LA 75

Date: 1953

Subject Property: No significant changes depicted North: No significant changes depicted South: No significant changes depicted No significant changes depicted West: No significant changes depicted No significant changes depicted

Date: 1963

Subject Property: No significant changes depicted North: No significant changes depicted South: No significant changes depicted

East: Appears to be primarily agricultural land with ten buildings bordering the subject

property in the southeast corner; railroad track in northeast corner

4.0 REGULATORY RECORDS REVIEW

4.1 Regulatory Agencies

4.1.1 State Department

Regulatory Agency Data

Name of Agency:

Point of Contact:

Agency Address:

Louisiana Department of Environmental Quality (LDEQ)

Electronic Document Management System (EDMS)

602 North 5th Street, Baton Rouge, Louisiana

Agency Phone Number: (225) 219-5337 **Date of Contact:** December 21, 2019

Method of Communication: Online

Summary of Communication: No records regarding hazardous substance use, storage or releases,

or the presence of USTs and AULs on the subject property were on

file with the LDEQ for the subject property.

Copies of pertinent documents are included in Appendix B of this report.

4.1.2 Health Department

Regulatory Agency Data

Name of Agency: Louisiana Department of Health - Iberville Parish Health Unit

(IPHU)

Point of Contact: Stacy Adler

Agency Address: 24705 Plaza Drive, Plaquemine, Louisiana

Agency Phone Number: (225) 687-5882 **Date of Contact:** December 30, 2019

Method of Communication: Telephone

Summary of Communication: No regulatory records were on file for the property. IPHU regulates

mechanical wastewater treatment systems in Iberville Parish but

does not have files on non-mechanical septic systems.

4.1.3 Fire Department

Regulatory Agency Data

Name of Agency: East Iberville Fire Department (EIFD)

Point of Contact: Chief Lee Massey

Agency Address: 2075 East Highway 30, St. Gabriel, Louisiana

Agency Phone Number: (225) 642-9980

Date of Contact: December 22, 2019

Method of Communication: Telephone

Summary of Communication: No records regarding call-outs for hazardous material storage or

releases were on file for the subject property. Chief Massey stated that he has no recollection of any hazardous material incidents on

the property.

4.1.4 Iberville Parish Permits and Inspections

Name of Agency: Iberville Parish Permits and Inspections Department

Point of Contact: Brian Romero

Agency Address: 58030 Meriam Street, Plaquemine, LA 70764

Agency Phone Number: (225) 6875150 **Date of Contact:** December 30, 2019

Method of Communication: Telephone

Summary of Communication: Based on the Iberville Parish maps, two addresses appear to be

associated with property: 6049 and 6051 LA 75. No building permits

were on file for the property.

4.1.5 City of St. Gabriel

Name of Agency: City St. Gabriel – Permit, Inspections, and Zoning Department

Point of Contact: Brad Morris

Agency Address: 5035 Iberville Street, St. Gabriel, LA 70776

Agency Phone Number: (225) 642-9600 Ext. 2266 **Date of Contact:** December 30, 2019

Method of Communication: Telephone

Summary of Communication: According to Mr. Morris, the subject property is zoned Heavy

Industrial (M2) by the City of St. Gabriel. No permits have been issued for the property and the City of St. Gabriel does not have a file associated with the property. A copy of the zoning map is

included in Appendix B.

4.1.6 Oil & Gas Exploration

Regulatory Agency Data

Name of Agency: Louisiana Department of Natural Resources (LDNR)

Point of Contact: Strategic Online Natural Resources Information System (SONRIS)

Agency Address: 617 North 3rd Street, Baton Rouge, Louisiana

Agency Phone Number: (225) 342-8955 **Date of Contact:** December 11, 2019

Method of Communication: Online

Summary of Communication: No oil and gas wells are located on the property

Copies of pertinent documents are included in Appendix B of this report.

4.1.7 4.1.5 National Pipeline Mapping Service

Regulatory Agency Data

Regulatory Agency Data

Name of Agency: U.S. Department of Transportation, Pipeline and Hazardous

Materials Safety Administration DOT/PHMSA.

Point of Contact: Katie Field, Project Manager.

Agency Address: NPMS National Repository, Michael Baker International

3601 Eisenhower Avenue, Suite 600, Alexandria, VA 22304

Agency Phone Number: 703-317-6294/npms@dot.gov

Date of Contact: December 22, 2019

Method of Communication: Online (https://www.npms.phmsa.dot.gov/Default.aspx)

Summary of Communication: The National Pipeline Mapping System (NPMS) Public Map Viewer

is a web-based mapping application designed to assist the general public with displaying and querying data related to gas transmission and hazardous liquid pipelines, liquefied natural gas plants, and breakout tanks under DOT PHMSA jurisdiction. The map depicts a hazardous liquid line (Benzene) along the southern and western edge of the property. No accidents or incidents are reported. A hazardous liquid and a gas transmission lines are shown running east-west across the northern portion of the property and along the northeast edge of the property. No incidents or accidents are reported on or

near the property.

4.1.8 Assessor's Office

Regulatory Agency Data

Name of Agency: Iberville Parish Tax Assessor (IPTA)

Point of Contact: Randy Sexton

Agency Address: 58050 Meriam Street, Plaquemine, Louisiana

Agency Phone Number: (225) 687-3568

Date of Contact: December 11, 2019

Method of Communication: Online

Summary of Communication: According to the Iberville Tax Assessor, the subject property

includes Parcels 0510638885, 0500639001, and 0500639001 and is owned by Syngenta Crop Protection, Inc. (Syngenta) since 2011.

The legal descriptions are included in Appendix B.

Copies of pertinent documents are included in Appendix B of this report.

4.2 Mapped Database Records Search

Information from standard federal, state, county, and city environmental record sources were provided by Environmental Data Resources, Inc. (EDR). Data from governmental agency lists are updated and integrated into one database, which is updated as these data are released. The information contained in this report was compiled from publicly available sources and the locations of the sites are plotted utilizing a geographic information system, which geocodes the site addresses. The accuracy of the geocoded locations is approximately +/-300 feet.

Using the ASTM definition of migration, Chenier considers the migration of hazardous substances or petroleum products in any form onto the subject property during the evaluation of each site listed on the radius report, which includes solid, liquid, and vapor.

4.2.1 Regulatory Database Summary

Radius Report Data				
Database	Search	Subject	Adjacent	Sites of
	Radius (mile)	Property	Properties	Concern
Federal NPL or Delisted NPL Site	1.00	N	N	N
Federal CERCLIS Site	0.50	N	N	N
Federal CERCLIS-NFRAP Site	0.50	N	N	N
Federal RCRA CORRACTS Facility	1.00	N	Y	N

4.2.2 Subject Property Listings

The subject property is not identified in the regulatory database report.

4.2.3 Adjacent Property Listings

Total Carville Polystyrene Plant (Agency Interest # 5176) (6225 LA 75)

The adjacent property to the east at 6225 LA 75, Total Carville Polystyrene Plant, is identified as a RCRA-LQG and EPA Watch List site. The facility has been classified as LQG since opening as Atofina Petrochemicals, Inc. in 1984. Hazardous wastes include ignitable waste, corrosive waste, reactive waste, barium, cadmium, chromium, lead, mercury, silver, benzene, and spent solvents. The facility has received notices of violations since 1988 and has achieved compliance in all cases. No spills or releases were reported in the EDR Radius Report.

<u>LDEQ File Review.</u> Chenier searched the Louisiana Department of Environmental Quality (LDEQ) Electronic Document Management System (EDMS) for files associated with this facility. The LDEQ AI number is for this facility is 5176. Chenier conducted a cursory review of the document listings on the

database and found no records that would indicate spills or releases that may have affected the subject property.

LDEQ conducted a comprehensive Air Quality inspection on June 18, 2019 that included a facility tour and records review. No issues were identified that could impact the subject property. Other records reviewed included a 2018-2019 Industrial Solid Waste Generator Annual Report dated July 29, 2019 and an LPDES (water discharge) Permit that was issued on September 10, 2019. The receiving waters named were a local drainage ditch then Bayou Braud. Chenier identified no documents in the LDEQ file that would indicate spills or releases of hazardous materials likely to impact the subject property.

4.2.4 Sites of Concern Listings

Total Petrochemicals and Refining USA, Inc (Agency Interest # 1607) – COS Mar (6325 Highway 75)

This facility is located approximately 3000 feet to the south of the property adjacent to the Total Carville Polystyrene Plant and identified as a Deleted State Hazardous Waste Site (DEL SHWS), Air Permit Site (AIRS), National Pollutant Discharge Elimination System (NPDES), ASBESTOS, and Remediation (REM) site. The LDEQ Agency Interest Number (AI) associated with the DEL SHWS is LDEQ 1607.

The DEL SHWS listing was evaluated and closed on July 27, 2019 and an NFA was issued.

The AIRS listing (AI 1607) was associated with a Title V Regular Permit air permit issued on October 9, 2018 and expires on September 16, 2020.

The ASBESTOS listing is associated with an asbestos removal project permit issued on November 24, 2010.

The NPDES listing is for an Individual Major Industrial water discharge permit renewal issued on September 24, 2018 and expires on September 30, 2023.

The REM (AI 1607) listing appeared to be associated with several issues around the railcar loading area and benzene tank area which were evaluated and closed between 2008 and 2018 by the LDEQ Groundwater Program.

<u>LDEQ File Review</u>. Chenier conducted a review of the LDEQ EDMS for files associated with this facility. The REM listing. A Phase II Environmental Assessment Figure dated March 14, 2019, depicts ethylbenzene contaminants and monitoring wells between a ditch and DNPC Transfer Tanks and the DNPC Building on the facility. A series of monthly, quarterly, and annual groundwater monitoring reports are on file with the most recent being received by LDEQ Underground Storage Tank Division on August 2, 2019. The release is being actively managed by LDEQ and Total, therefore, it does not represent a recognized environmental condition to the subject property.

LDEQ issued an air permit for the facility in October 2019. Total submitted a semi-annual, monthly and quarterly groundwater monitoring report on July 30, 2019.

4.2.5 Orphan Listings

No orphan listings of concern are identified in the regulatory database report.

A copy of the regulatory database report is included in Appendix C of this report.			

5.0 USER PROVIDED INFORMATION AND INTERVIEWS

In order to qualify for one of the *Landowner Liability Protections (LLPs)* offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the *Brownfields Amendments*), the *User* must conduct the following inquiries required by 40 CFR 312.25, 312.28, 312.29, 312.30, and 312.31. The *User* should provide the following information to the *environmental professional*. Failure to provide this information could result in a determination that *all appropriate inquiries* is not complete. The *User* is asked to provide information or knowledge of the following:

- Review Title and Judicial Records for Environmental Liens and AULs
- Specialized Knowledge or Experience of the User
- Actual Knowledge of the User
- Reason for Significantly Lower Purchase Price
- Commonly Known or *Reasonably Ascertainable* information
- Degree of Obviousness
- Reason for Preparation of this Phase I ESA

Fulfillment of these user responsibilities is key to qualification for the identified defenses to CERCLA liability. Chenier requested our Client to provide information to satisfy User Responsibilities as identified in Section 6 of the ASTM guidance.

Pursuant to ASTM E1527-13, Chenier requested the following site information from (User of this report).

User Responsibilities				
Item	Provided By User	Not Provided By User	Discussed Below	Does Not Apply

5.1 Interviews

5.1.1 Interview with Owner

Mr. Wally Settoon, subject property owner representative (Shift Manager at Syngenta), was not aware of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on,

or from the subject property; any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the subject property; or any notices from a governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products.

According to Mr. Settoon, the subject property was historically a pecan orchard and has been used for cattle grazing for over 40 years. An old sugar mill was located on nearby property. Mr. Settoon further stated that there are no USTs, ASTs, clarifiers, oil/water separators, groundwater monitoring wells, or hazardous substance use/storage/generation on the subject property to the best of his knowledge.

5.1.2 Interview with Report User

Please refer to Section 5.2 below for information requested from the Report User.

Mr. Russell Richardson, report user, was not aware of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the subject property; any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the subject property; or any notices from a governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products.

5.1.3 Interview with Key Site Manager

See section 5.1.2.

5.1.4 Interviews with Past Owners, Operators and Occupants

Interviews with past owners, operators and occupants were not conducted since information regarding the potential for contamination at the subject property was obtained from other sources.

5.1.5 Interview with Others

Mr. Marty Burat currently leases the property for cattle grazing. His family has leased the land for over 40 and he is unaware of any hazardous materials or petroleum products ever being used, stored, or released on the property. Mr. Burat was knowledgeable of the layout of the property and pointed out several notable features in the southeast corner of the property including a water well, old buried septic tank, buried butane tank, and the location of a buried benzene pipeline that crosses the property. Mr. Burat was unaware of any cattle dipping vats or any other potential environmental issues on the property.

5.2 User Provided Information

5.2.1 Title Records, Environmental Liens, and AULs

The User does not have title records and is unaware of any environmental liens or AULs.

5.2.2 Specialized Knowledge

The User did not have specialized knowledge of environmental conditions associated with the subject property at the time of the assessment.

5.2.3 Actual Knowledge of the User

The User was not aware of environmental liens and/or AULs encumbering the subject property or in connection with the subject property at the time of the assessment.

5.2.4 Valuation Reduction for Environmental Issues

The User was not aware of any reductions in property value due to environmental issues.

5.2.5 Commonly Known or Reasonably Ascertainable Information

The User did not provide information that is commonly known or *reasonably ascertainable* within the local community about the subject property at the time of the assessment.

6.0 SITE RECONNAISSANCE

The weather at the time of the site visit was sunny and clear. Refer to Section 1.5 for limitations encountered during the field reconnaissance and Sections 2.1 and 2.2 for subject property operations. The table below provides the site assessment details:

Site Assessment Data

Site Assessment Performed By: Aaron S. Bass
Site Assessment Conducted On: November 5, 2019

The table below provides the subject property personnel interviewed during the field reconnaissance:

Site Visit Personnel for Syngenta Site off Highway 75 (Subject Property)					
Name	Title/Role	Contact Number	Site Walk* Yes/No		
Wally Settoon	Key Site Manager	(225) 692-4027	Yes		
Marty Burat	Lessor/Cattle Rancher	(225) 717-8520	Yes		

^{*} Accompanied Chenier during the field reconnaissance activities and provided information pertaining to the current operations and maintenance of the subject property

No potential environmental concerns were identified during the onsite reconnaissance.

6.1 General Site Characteristics

6.1.1 Solid Waste Disposal

Other than household garbage and debris discarded near the front gate, there was no evidence of illegal dumping of solid waste was observed during the Chenier site reconnaissance.

6.1.2 Sewage Discharge and Disposal

There is no sanitary discharge and disposal on the property. An old concrete septic tank is buried near the southeast corner of the property near the water well building and cattle pens.

6.1.3 Surface Water Drainage

Storm water is removed from the subject property primarily by percolation into the ground. Bayou Braud also provides drainage in the northern part of the property.

Portions of the subject property appear to be a designated wetland area, based on information obtained from the United States Fish & Wildlife Service; however, a comprehensive wetlands survey would be required in order to formally determine actual wetlands on the subject property. No surface impoundments, natural catch basins, settling ponds, or lagoons are located on the subject property. No drywells were identified on the subject property.

6.1.4 Source of Heating and Cooling

There are no buildings with heating and cooling on the property.

6.1.5 Wells and Cisterns

A water well is located a small metal shed near the southeast corner of the property.

6.1.6 Wastewater

Domestic wastewater is not currently generated at the subject property. No industrial process is currently performed at the subject property.

6.1.7 Septic Systems

A concrete septic tank is buried near the water well shed and cattle pens in the southeast corner of the property.

6.1.8 Additional Site Observations

No additional general site characteristics were observed during the site reconnaissance.

6.2 Potential Environmental Hazards

6.2.1 Hazardous Substances and Petroleum Products Used or Stored at the Site

No hazardous substances or petroleum products were observed on the subject property during the site reconnaissance.

6.2.2 Pipelines

Placards marking the locations of numerous pipelines crossing the property were observed. These are shown on Figure 2 and included in the following table.

Owner/Operator	Description	Contact Information	Location
Pioneers Americas, LLC	Hydrogen Gas Pipeline	225-642-1835	Along northern border
Pioneers Americas, LLC	Liquified Chlorine Pipeline	225-642-1834	Along northern border
Kinder Morgan St. Gabriel	Benzene Pipeline	855-779-0071	In powerline right-of- way north of Bayou Braud
Enterprise Products- Acadian Natural Gas Pipeline	Natural Gas Pipeline	1-800-600-6240	Pipeline corridor south of Bayou Braud
Boardwalk Louisiana Midstream, LLC	Natural Gas Pipeline	1-800-850-0051	Pipeline corridor south of Bayou Braud
Boardwalk Louisiana Midstream, LLC	Brine Pipeline	1-225-387-0871	Near railroad bridge
Louisiana Aromatix Pipeline	Benzene Pipeline	1-888-650-444	Along southern and western edges of property

6.2.3 Aboveground & Underground Hazardous Substance or Petroleum Product Storage Tanks (ASTs/USTs)

One underground butane tank is in the southeast corner of the property near the old cattle pens and water well shed. Mr. Burat identified the location of the tank during the site reconnaissance. No other ASTs or USTs were present on the subject property.

6.2.4 Evidence of Releases

No spills, stains or other indications that a surficial release has occurred at the subject property were observed.

6.2.5 Polychlorinated Biphenyls (PCBs)

No potential PCB-containing equipment (transformers, oil-filled switches, hoists, lifts, dock levelers, hydraulic elevators, etc.) was observed on the subject property during Chenier's reconnaissance.

6.2.6 Strong, Pungent or Noxious Odors

No strong, pungent or noxious odors were evident during the site reconnaissance.

6.2.7 Pools of Liquid

No pools of liquid were observed on the subject property during the site reconnaissance.

6.2.8 Drains, Sumps and Clarifiers

No drains, sumps, or clarifiers were observed on the subject property during the site reconnaissance.

6.2.9 Pits, Ponds and Lagoons

No pits, ponds or lagoons were observed on the subject property.

6.2.10 Stressed Vegetation

No stressed vegetation was observed on the subject property.

6.2.11 Additional Potential Environmental Hazards

No additional environmental hazards, including landfill activities or radiological hazards, were observed.

6.3 Non-ASTM Services

No non-ASTM services were provided.

6.4 Adjacent Property Reconnaissance

The adjacent property reconnaissance consisted of observing the adjacent properties from the subject property premises.

6.4.1 Hazardous Substances and Petroleum Products Used or Stored at the Site

The adjacent property to the east is occupied by the Total Carville Polystyrene Plant and a railroad spur. As discussed in Section 4.2.3, hazardous materials are generated at this facility. The facility has received

notices of violations since 1988 and has achieved compliance in all cases. No indications of spills or releases that could affect the subject property were observed during the site reconnaissance.

The adjacent property to the west is occupied by Hercules Transport Company (Hercules). Hercules transports liquified petroleum gas, anhydrous ammonia, and well as other chemicals. No indications of spills or releases that could affect the subject property were observed during the site reconnaissance.

7.0 FINDINGS AND CONCLUSIONS

Findings

A *REC* refers to the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: due to release to the environment; under conditions indicative of a release to the environment; or under conditions that pose a material threat of a future release to the environment. The following was identified during the course of this assessment:

Chenier did not identify any recognized environmental conditions during this assessment.

A *CREC* refers to a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls. The following was identified during the course of this assessment:

Chenier did not identify any controlled recognized environmental conditions during this
assessment.

A *HREC* refers to a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls. The following was identified during the course of this assessment:

• Chenier did not identify any historical recognized environmental conditions during this assessment.

An *environmental issue* refers to environmental concerns identified by Chenier, which do not qualify as RECs; however, warrant further discussion. The following was identified during this assessment:

Chenier did not identify any environmental issues during this assessment except for the presence
of an underground butane tank. Chenier recommends that a qualified contractor be used to
identify and remove butane tank prior to property development.

Conclusions, Opinions and Recommendations

Chenier has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-13 of Highway 75 in Iberville Parish, Louisiana (the "subject property"). Any exceptions to, or deletions from, this practice are described in Section 1.5 of this report.

This assessment has revealed no evidence of recognized environmental conditions in connection with the subject property. No environmental issues were identified in connection with the subject property except for the presence of an underground butane tank near the southeast corner of the property. Chenier recommends that a qualified contractor be used to identify and remove the butane tank prior to site development. Based on the conclusions of this assessment, Chenier recommends no further investigation of the subject property at this time.

8.0 SIGNATURES OF ENVIRONMENTAL PROFESSIONALS

Chenier has performed a Phase I Environmental Site Assessment of the property located at Highway 75 in Iberville Parish, Louisiana in conformance with the scope and limitations of the protocol and the limitations stated earlier in this report. Exceptions to or deletions from this protocol are discussed earlier in this report.

By signing below, Chenier declares that, to the best of our professional knowledge and belief, we meet the definition of *Environmental Professional* as defined in §312.10 of 40 CFR §312. Chenier has the specific qualifications based on education, training, and experience to assess a *property* of the nature, history, and setting of the subject *property*. Chenier has developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Chenier Environmental Consulting were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Certification # 0E9E-4467-B379

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

RESEARCH SUMMARY

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in **bold italics** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 03/25/2019 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
ZENECA AG PROD INC	4990-A ICI RD	WNW 1/2 - 1 (0.652 mi.)	5	51
EPA ID:: LAD980627061				

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 03/25/2019 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

CARVILLE POLYSTYRENE	6225 HIGHWAY 75	ESE 1/8 - 1/4 (0.177 mi.)	1	8

State and tribal landfill and/or solid waste disposal site lists

SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Department of Environmental Quality's Louisiana's Solid Waste Facilities list.

A review of the SWF/LF list, as provided by EDR, and dated 06/11/2019 has revealed that there are 2 SWF/LF sites within approximately 0.5 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Lists of Hazardous waste / Contaminated Sites

DEL SHWS: A listing of sites removed from the Potential and Confirmed Listing.

A review of the DEL SHWS list, as provided by EDR, and dated 07/16/2019 has revealed that there is 1 DEL SHWS site within approximately 1 mile of the target property.

1000142966

MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT

WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

108336 Amount (Lbs):

Waste code: D009 Waste name: MERCURY Amount (Lbs): 508

Waste code: D035

Waste name: METHYL ETHYL KETONE

Amount (Lbs): 7980

Waste code: D039

TETRACHLOROETHYLENE Waste name:

Amount (Lbs): 500

Waste code: D040

Waste name: TRICHLOROETHYLENE

Amount (Lbs): 500

Waste code: F002

Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE,

METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE,

CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND

1,1,2-TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE LISTED IN F001, F004, OR F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND

SPENT SOLVENT MIXTURES.

Amount (Lbs): 6940

Waste code: F003

Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL

ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL

ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL

BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT

MIXTURES.

Amount (Lbs): 7980

Waste code: F005

Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL

KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE,

2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF

THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Amount (Lbs): 7980

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)
RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation
and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database
includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste
as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate
less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

Date of Government Version: N/A Date Data Arrived at EDR: N/A Date Made Active in Reports: N/A Number of Days to Update: N/A Source: EDR, Inc. Telephone: N/A Last EDR Contact: N/A

Data Release Frequency: No Update Planned

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services,

a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Version Date: 2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

- 1. Groundwater flow direction, and
- 2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

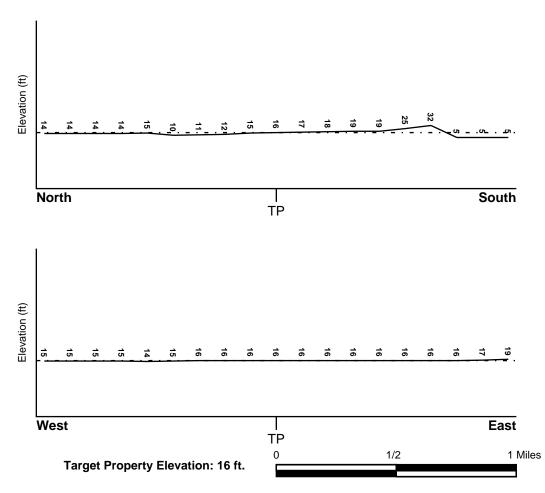

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General North

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

22047C0355D FEMA FIRM Flood data

Additional Panels in search area: FEMA Source Type

Not Reported

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property Data Coverage

CARVILLE YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius: 1.25 miles Status: Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

LOCATION GENERAL DIRECTION
MAP ID FROM TP GROUNDWATER FLOW
Not Reported

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Vacherie

Soil Surface Texture: silt loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward

movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Somewhat poorly drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 61 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic	
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	conductivity micro m/sec	Oon Nouvelon
1	0 inches	20 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 0.42 Min: 0	Max: 8.4 Min: 6.6
2	20 inches	59 inches	silty clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 0.42 Min: 0	Max: 8.4 Min: 6.6

Soil Map ID: 2

Soil Component Name: Gramercy

Soil Surface Texture: silty clay loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high

water table, or are shallow to an impervious layer.

Soil Drainage Class: Poorly drained

Hydric Status: All hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 31 inches

			Soil Layer	Information			
	Boundary			Classification		Saturated hydraulic	
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	conductivity micro m/sec	Soil Reaction (pH)
1	0 inches	3 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 1.41 Min: 0.42	Max: 8.4 Min: 6.1
2	3 inches	40 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 1.41 Min: 0.42	Max: 8.4 Min: 6.1
3	40 inches	70 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 1.41 Min: 0.42	Max: 8.4 Min: 6.1
4	70 inches	79 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 1.41 Min: 0.42	Max: 8.4 Min: 6.1

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

MAP INFORMATION

The soil surveys that comprise your AOI were mapped at 1:24.000.

Warning: Soil Map may not be valid at this scale.

Enlargement of maps beyond the scale of mapping can cause misunderstanding of the detail of mapping and accuracy of soil line placement. The maps do not show the small areas of contrasting soils that could have been shown at a more detailed scale

Please rely on the bar scale on each map sheet for map measurements.

Source of Map: Natural Resources Conservation Service Web Soil Survey URL:

Coordinate System: Web Mercator (EPSG:3857)

Maps from the Web Soil Survey are based on the Web Mercator projection, which preserves direction and shape but distorts distance and area. A projection that preserves area, such as the Albers equal-area conic projection, should be used if more accurate calculations of distance or area are required.

This product is generated from the USDA-NRCS certified data as of the version date(s) listed below.

Soil Survey Area: Iberville Parish, Louisiana Survey Area Data: Version 12, Sep 11, 2019

Soil map units are labeled (as space allows) for map scales 1:50.000 or larger.

Date(s) aerial images were photographed: Oct 6, 2016—Dec 11, 2017

The orthophoto or other base map on which the soil lines were compiled and digitized probably differs from the background imagery displayed on these maps. As a result, some minor shifting of map unit boundaries may be evident.

Map Unit Legend

The Water We Drink

IBERVILLE PARISH UTILITY DEPARTMENT EAST IBERVILLE WATER SYSTEM

Public Water Supply ID: LA1047007

We are pleased to present to you the Annual Water Quality Report for the year 2018. This report is designed to inform you about the quality of your water and services we deliver to you every day (Este informe contiene información muy importante sobre su agua potable. Tradúzcalo o hable con alguien que lo entienda bien). Our constant goal is to provide you with a safe and dependable supply of drinking water. We want you to understand the efforts we make to continually improve the water treatment process and protect our water resources. We are committed to ensuring the quality of your water.

Our water system purchases water as listed below:

Buyer Name	Seller Name
EAST IBERVILLE WATER SYSTEM	BATON ROUGE WATER COMPANY

The sources of drinking water (both tap water and bottled water) include rivers, lakes, streams, ponds, reservoirs, springs, and wells. As water travels over the surface of land or through the ground, it dissolves naturally-occurring minerals and, in some cases, radioactive material, and can pick up substances resulting from the presence of animals or from human activity. Contaminants that may be present in source water include:

<u>Microbial Contaminants</u> - such as viruses and bacteria, which may come from sewage treatment plants, septic systems, agricultural livestock operations, and wildlife.

<u>Inorganic Contaminants</u> - such as salts and metals, which can be naturally-occurring or result from urban stormwater runoff, industrial, or domestic wastewater discharges, oil and gas production, mining, or farming.

Pesticides and Herbicides - which may come from a variety of sources such as agriculture, urban stormwater runoff, and residential uses.

<u>Organic Chemical Contaminants</u> – including synthetic and volatile organic chemicals, which are by-products of industrial processes and petroleum production, and can also come from gas stations, urban stormwater runoff, and septic systems.

Radioactive Contaminants – which can be naturally-occurring or be the result of oil and gas production and mining activities.

In order to ensure that tap water is safe to drink, EPA prescribes regulations which limit the amount of certain contaminants in water provided by public water systems. Food and Drug Administration regulations establish limits for contaminants in bottled water which must provide the same protection for public health. We want our valued customers to be informed about their water utility. If you have any questions about this report, want to attend any scheduled meetings, or simply want to learn more about your drinking water, please contact IBERVILLE PARISH UTILITY DEPARTMENT at 225-687-5152.

If present, elevated levels of lead can cause serious health problems, especially for pregnant women and young children. Lead in drinking water is primarily from materials and components associated with service lines and home plumbing. EAST IBERVILLE WATER SYSTEM is responsible for providing high quality drinking water, but cannot control the variety of materials used in plumbing components. When your water has been sitting for several hours, you can minimize the potential for lead exposure by flushing your tap for 30 seconds to 2 minutes before using water for drinking or cooking. If you are concerned

about lead in your water, you may wish to have your water tested. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available from the Safe Drinking Water Hotline or at http://www.epa.gov/safewater/lead.

The Louisiana Department of Health and Hospitals - Office of Public Health routinely monitors for constituents in your drinking water according to Federal and State laws. The tables that follow show the results of our monitoring during the period of January 1st to December 31st, 2018. Drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that water poses a health risk.

In the tables below, you will find many terms and abbreviations you might not be familiar with. To help you better understand these terms, we've provided the following definitions:

Parts per million (ppm) or Milligrams per liter (mg/L) - one part per million corresponds to one minute in two years or a single penny in \$10,000.

Parts per billion (ppb) or Micrograms per liter (ug/L) – one part per billion corresponds to one minute in 2,000 years, or a single penny in \$10,000,000.

<u>Picocuries per liter (pCi/L)</u> – picocuries per liter is a measure of the radioactivity in water.

<u>Nephelometric Turbidity Unit (NTU)</u> – nephelometric turbidity unit is a measure of the clarity of water. Turbidity in excess of 5 NTU is just noticeable to the average person.

<u>Treatment Technique (TT)</u> – an enforceable procedure or level of technological performance which public water systems must follow to ensure control of a contaminant.

Action level (AL) – the concentration of a contaminant that, if exceeded, triggers treatment or other requirements that a water system must follow.

<u>Maximum contaminant level (MCL)</u> – the "Maximum Allowed" MCL is the highest level of a contaminant that is allowed in drinking water. MCL's are set as close to the MCLG's as feasible using the best available treatment technology.

<u>Maximum contaminant level goal (MCLG)</u> – the "Goal" is the level of a contaminant in drinking water below which there is no known or expected risk to human health. MCLG's allow for a margin of safety.

<u>Maximum residual disinfectant level (MRDL)</u> – The highest level of a disinfectant allowed in drinking water. There is convincing evidence that addition of a disinfectant is necessary for control of microbial contaminants.

<u>Maximum residual disinfectant level goal (MRDLG)</u> – The level of a drinking water disinfectant below which there is no known or expected risk to health. MRDLGs do not reflect the benefits of the use of disinfectants to control microbial contaminants.

<u>Level 1 assessment</u> – A study of the water system to identify potential problems and determine (if possible) why total coliform bacteria have been found in our water system.

<u>Level 2 Assessment</u> – A very detailed study of the water system to identify potential problems and determine (if possible) why an E. coli MCL violation has occurred and/or why total coliform bacteria have been found in our water system on multiple occasions.

During the period covered by this report we had below noted violations of drinking water regulations.

Compliance Period	Analyte	Туре	
No Violations Occurred in the Calendar Year of 2018			

Our water system tested a minimum of 5 samples per month in accordance with the Total Coliform Rule for microbiological contaminants. With the microbiological samples collected, the water system collects disinfectant residuals to ensure control of microbial growth.

Disinfectant	Date	Highest RAA	Unit	Lowest	Highest	MRDL	MRDLG	Typical Source
Chloramines	2018	1.63	ppm	1.22	1.83	4	4	Water additive used to control microbes

In the tables below, we have shown the regulated contaminants that were detected. Chemical Sampling of our drinking water may not be required on an annual basis; therefore, information provided in this table refers back to the latest year of chemical sampling results.

Regulated Contaminants	Collection Date	Water System	Highest Value	Range	Unit	MCL	MCLG	Typical Source
ASBESTOS	12/3/2018	BATON ROUGE WATER COMPANY	1	1	MFL	7	7	Decay of asbestos cement water mains; Erosion of natural deposits
DI(2- ETHYLHEXYL) PHTHALATE	9/24/2018	BATON ROUGE WATER COMPANY	0.67	0.52 - 0.67	ppb	6	0	Discharge from rubber and chemical factories
FLUORIDE	9/24/2018	BATON ROUGE WATER COMPANY	0.9	0.1 - 0.9	ppm	4	4	Erosion of natural deposits; Water additive which promotes strong teeth; Discharge from fertilizer and aluminum factories
NITRATE- NITRITE	9/20/2018	BATON ROUGE WATER COMPANY	0.2	0.2	ppm	10	10	Runoff from fertilizer use; Leaching from septic tanks, sewage; Erosion of natural deposits

Radionuclides	Collection Date	Highest Value	Range	Unit	MCL	MCLG	Typical Source		
No Detected Results were Found in the Calendar Year of 2018									

Lead a	and	Date	90 [™] Percentile	Range	Unit	AL	Sites Over AL	Typical Source
LEAD		2016 - 2018	3	1 - 3	ppb	15	0	Corrosion of household plumbing systems; Erosion of natural deposits

Disinfection Byproducts	Sample Point	Period	Highest LRAA	Range	Unit	MCL	MCLG	Typical Source
TOTAL HALOACETIC ACIDS (HAA5)	1125 HWY 991	2018	1	1.46 - 1.46	ppb	60	0	By-product of drinking water disinfection
TOTAL HALOACETIC ACIDS (HAA5)	2005 BESSON ROAD	2018	1	1.11 - 1.11	ppb	60	0	By-product of drinking water disinfection
ТТНМ	1125 HWY 991	2018	1	1 - 1	ppb	80	0	By-product of drinking water chlorination
ТТНМ	2005 BESSON ROAD	2018	0	0 - 0	ppb	80	0	By-product of drinking water chlorination

Secondary Contaminants	Collection Date	Water System	Highest Value	Range	Unit	SMCL
ALUMINUM	12/11/2018	BATON ROUGE WATER COMPANY	0.02	0.01 - 0.02	MG/L	0.2
CHLORIDE	9/20/2018	BATON ROUGE WATER COMPANY	283	283	MG/L	250
IRON	12/4/2018	BATON ROUGE WATER COMPANY	0.04	0.01 - 0.04	MG/L	0.3
MANGANESE	9/20/2018	BATON ROUGE WATER COMPANY	0.12	0.01 - 0.12	MG/L	0.05
PH	12/11/2018	BATON ROUGE WATER COMPANY	8.78	6.15 - 8.78	PH	8.5
SULFATE	9/20/2018	BATON ROUGE WATER COMPANY	9	6 - 9	MG/L	250

There are no additional required health effects notices.

There are no additional required health effects violation notices.

Thank you for allowing us to continue providing your family with clean, quality water this year. In order to maintain a safe and dependable water supply we sometimes need to make improvements that will benefit all of our customers.

We at the EAST IBERVILLE WATER SYSTEM work around the clock to provide top quality drinking water to every tap. We ask that all our customers help us protect and conserve our water sources, which are the heart of our community, our way of life, and our children's future. Please call our office if you have questions.

EXPERIENCE SUMMARY

Aaron Bass has over 24 years of experience as an environmental scientist. He has completed 100+ Phase I Environmental Site Assessments on rural, residential, commercial, industrial, and oil and gas producing properties throughout Louisiana, Texas, Alabama, and Mississippi.

Project Experience:

Environmental Due Diligence Projects

- Phase I Environmental Site Assessments for numerous potential elementary school sites for Ascension Parish School Board.
- Phase I Environmental Site Assessments for Cajun Constructors, Inc. on a 50-Acre Tract in Port Allen, Louisiana.
- Phase I/II Environmental Site Assessments for Cajun Constructors, Inc. on a 1.3-Acre Site in Prairieville, Louisiana.
- Multiple Phase I Environmental Site assessments on large tracts of oil and gas producing properties for Chevron Environmental Management Company. Projects completed throughout Louisiana.
- Numerous Phase I Environmental Site Assessments of commercial, residential, and oil and gas properties throughout Louisiana.
- Phase I Environmental Site Assessment of 60,500-acre tract in southeast Louisiana prior to purchase by the State of Louisiana Department of Wildlife and Fisheries. This tract later became the Maurepas Swamp Wildlife Management Area.
- Phase I Environmental Site Assessment and assisted with wetland delineation of compressor station site for the Starks Gas Storage Facility in Calcasieu Parish, Louisiana.
- Phase I and Phase II Environmental Site Assessments for locally owned restaurant franchise throughout Louisiana, Mississippi, and Texas.
