

# Exhibit P. Acadiana Regional Airport P4 Site Natural Gas Infrastructure Upgrade Letter & Map

### Acadiana Regional Airport P4 Site Natural Gas Infrastructure Upgrade Letter & Map

General Notes:

- 1. No attempt has been made by CSRS, Inc. to verify site boundary, title, actual legal ownership, deed restrictions, servitudes, easements, or other burdens on the property, other than that furnished by the client or his representative.
- 2. Transportation data from 2013 TIGER datasets via U.S. Census Bureau at ftp://ftp2.census.gov/geo/tiger/TIGER2013.
- 3. Utility information from visual inspection and/or the individual utility operators. Exact field location has not been determined by survey. The lines shown are an approximate representation only and may have been offset for depiction purposes.
- 4. 2015 aerial imagery from USDA-APFO National Agricultural Inventory Project (NAIP) and may not reflect current ground conditions.
- 5. Proposed natural gas upgrade shown is for representational purposes only, depicting the intent of the cost estimate provided with this exhibit to meet LED minimum requirements, and is subject to revision.

Re. Acadiana Regional Airport P4 Site Natural Gas System

Cost Estimate CSRS Job No. 214002

Dear Mr. Hager:

According to local utility officials, the Acadiana Regional Airport P4 Site located in Iberia Parish, Louisiana has access to a natural gas line operated by Gulf South Pipeline Company, LP near the site that may be available for natural gas access. A natural gas distribution line operated by Southern Natural Gas Co. also exists near the site and may be available for natural gas access. In order to provide an adequate natural gas supply to the site, a tapping and meter station will need to be constructed.

Exact location of the tapping station will need to be determined by the provider based on needed capacity and the location of the proposed site pad. The construction cost of a natural gas tapping station is estimated to be \$400,000. This cost does not include a distribution line to reach the proposed site pad and cannot be determined until the location of the site pad is verified.

Please note this estimate does not include engineering, required rights of way, environmental impacts, or operation and maintenance costs. This cost estimate was prepared with the best information available at the time of certification. The actual costs can vary based on the availability of material, site conditions and labor availability. This plan can be executed within a reasonable timetable of 6 months or less based on preliminary engineering judgment.

Thank you for the opportunity to assist you in this project. Should you have any questions or require additional information, feel free to contact me.

Sincerely,

CSRS, In

Taylor M. Gravois, PE, PLS

One Acadiana Regional Airport P4 Site Natural Gas Cost Estimate Job No. 214002

Rough Order of Magnitude Cost Estimate							
Item No.	Description	Unit	Est. Quantity		Unit Price		Extension
1	High Pressure Tap and Metering Station	Each	1	\$	400,000.00	\$	400,000.00
					Subtotal:		\$400,000.00
			20% Contingency 1:				\$80,000.00
Rough Order of Magnitude (ROM):						\$	480,000.00

#### Footnotes:

- 1.) Does not include costs for engineering, permitting, or general project management.
- 2.) This cost estimate was prepared with the best information available at the time of certification.
- 3.) Actual costs can vary based on availability of material, site conditions, and labor.
