Exhibit J. Calhoun Technology Park - South Site Potable Water Infrastructure Upgrade Letter & Map
General Notes:
1. No attempt has been made by CSRS, Inc. to verify site boundary, title, actual legal ownership, deed restrictions, servitudes, easements, or other burdens on the property, other than that furnished by the client or his representative.
3. Utility information from visual inspection and/or the individual utility operators. Exact field location has not been determined by survey. The lines shown are an approximate representation only and may have been offset for depiction purposes.
4. 2015 aerial imagery from USDA-APFO National Agricultural Inventory Project (NAIP) and may not reflect current ground conditions.
5. Proposed potable water upgrade shown is for representational purposes only, depicting the intent of the cost estimate provided with this exhibit to meet LED minimum requirements, and is subject to revision.

Re.   Calhoun Technology Park – South Site Potable Water System Cost Estimate  
CSRS Job No. 216269

Dear Ms. Pierre:

According to correspondence with local utility officials, the Calhoun Technology Park – South Site located in Ouachita Parish, Louisiana has access to a 6-inch potable water line but the line does not have capacity to service the site. In order to provide adequate potable/process water supply the construction of a water well and storage tank on site is required.

A potable water treatment facility would need to be constructed on this site to service the property. In March 2017 Lazenby & Associates created a sample layout and cost estimate detailing the cost to do the engineering work needed for construction of the system as well and the cost of constructing the system itself. An on-site facility capable of providing service to the site would include a 350,000-gallon water storage tank and 250,000 GPD potable water well. The cost of these infrastructure upgrade is estimated to be approximately $1,200,000.

Please note this estimate does not include engineering, required rights of way, environmental impacts, or operation and maintenance costs. This cost estimate was prepared with the best information available at the time of certification. The actual costs can vary based on the availability of material, site conditions and labor availability. This plan can be executed within a reasonable timetable of 18 months or less based on preliminary engineering judgment.

Thank you for the opportunity to assist you in this project. Should you have any questions or require additional information, feel free to contact me.

Sincerely,

Taylor M. Gravois, PE, PLS

---

**Is potable or process water currently available at this site?**

- [ ] Yes  
- [ ] No

**What is the distance (feet) to the nearest potable or process water distribution line to service this site?**

---

**What is the size (inches in diameter) of the nearest line?**

- [ ] 6 (inches)

**What are the pressures of the water line at or nearest to this site?**

- Static: 50 psi
- Residual: 6 psi

**Source of potable or process water (lake, well, other source):**

- [ ] Lake
- [ ] Well
- [ ] Other

**What is the total potable/process capacity of the existing water system in millions of gallons per day (MGD)?**

- [ ] Unknown

**What is the current average daily use of the existing water system in millions of gallons per day (MGD)?**

- [ ] Unknown

**What is the peak demand on the existing water system in millions of gallons per day (MGD)?**

- [ ] 400 GPM

**What is the excess capacity of the existing water system in millions of gallons per day (MGD)?**

- [ ] 0

**Capacity of closest elevated potable water storage tank (gallons):**

- [ ] 2500

**Distance to closest elevated potable water storage tank (miles):**

- [ ] 3.0

**Distance to appropriate booster station (miles):**

- [ ] 3.0

---

**Is or will there be adequate pressure and flow at site to combat fires?**

- [ ] Yes  
- [ ] No

---

**Is a plan underway to improve services at or near this site within the next year? If so, please provide anticipated upgrades, location, and time for implementation.**

- [ ] Installing new storage tank and variable speed pump.
Please provide a map of existing utilities near the site. (click in area to insert image)
