South Schaefer Site Wetlands & Cultural Encumbrances

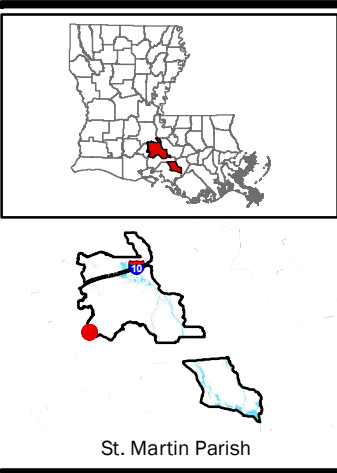

South Schaefer Site Wetlands & Cultural Encumbrances

Key Site Points:

- The 2023 Wetland Delineation completed by Coastal Environments, Inc. did not identify any wetlands within the boundary of the site.
- The 2023 Phase I Cultural Resources Survey completed by All Phases Archaeology identified one archaeological site with the potential to be eligible for the National Register of Historical Places (NRHP).
- The archaeological site is potentially eligible because the rest of the archaeological site is beyond the boundary of the South Schaefer Site.
- Since the archaeological site could not be fully delineated, it was recommended the archaeological site be avoided until it can be investigated further.
- A 50-foot buffer was recommended by All Phases Archaeology, but the State Historic Preservation Office (SHPO) will ultimately decide the buffer for the archaeological site.
- The 2023 Wetland Delineation completed by Coastal Environments, Inc. has been submitted to the U.S. Army Corps of Engineers (USACE) for a Preliminary Jurisdictional Determination (PJD) on January 24, 2024. The PJD process has begun, and the information submitted to the USACE is under review.

South Schaefer Site
St. Martin Parish, LA

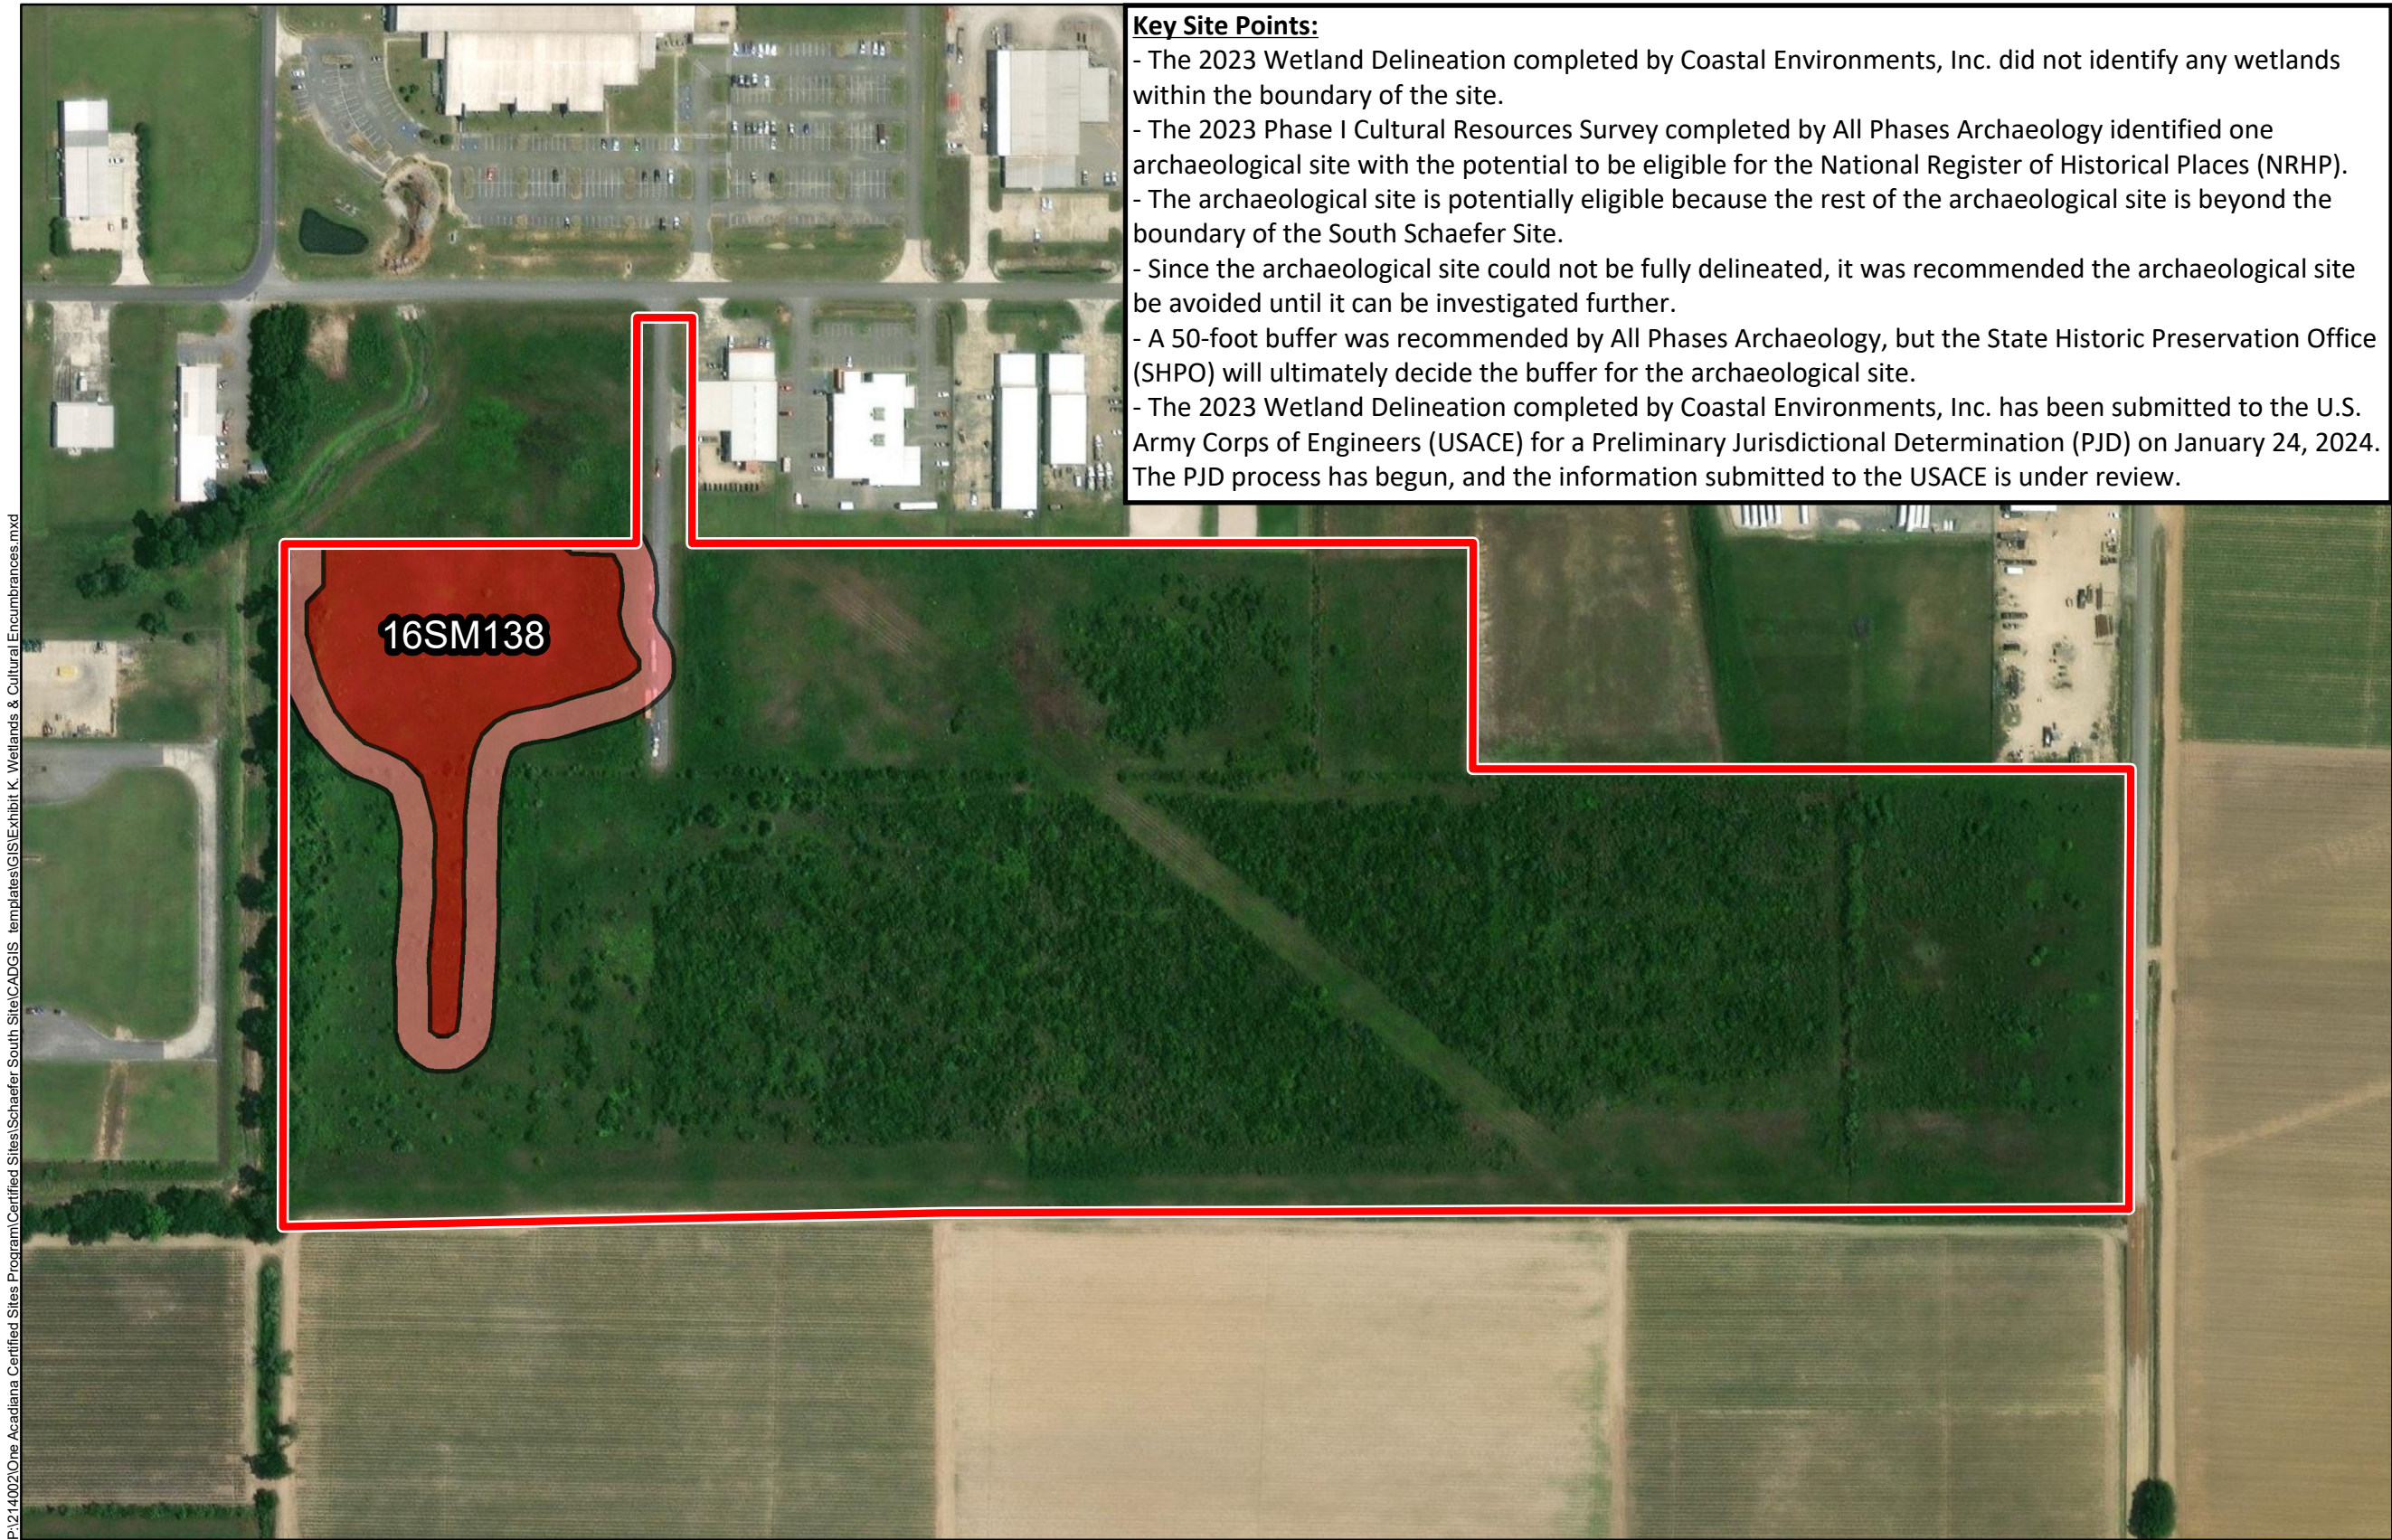

One Acadiana

LEGEND

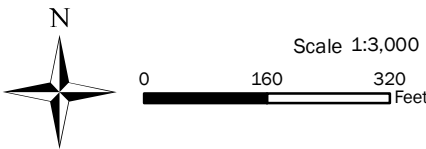

- Site Boundary (52.48± ac.)
- Archaeological Site 16SM138 (3.1± ac.)
- 50-foot Buffer (2± ac.)

General Notes:

1. No attempt has been made by CSRS, Inc. to verify site boundary, title, actual legal ownership, deed restrictions, servitudes, easements, or other burdens on the property, other than that furnished by the client or his representative.
2. Transportation data from 2013 TIGER datasets via U.S. Census Bureau at [ftp://ftp2.census.gov/geo/tiger/TIGER2013](http://ftp2.census.gov/geo/tiger/TIGER2013).
3. 2015 aerial imagery from USDA-APFO National Agricultural Inventory Project (NAIP) and may not reflect current ground conditions.
4. The Wetland Delineation completed by Coastal Environments, Inc dated November 2023 indicated no potential wetlands within the site boundary.
5. The cultural resources data was derived from a Phase I Cultural Resources Survey completed by All Phases Archaeology dated October 13, 2023.
