

EXHIBIT H - WATER SERVICE PROVIDER LETTER

September 19, 2011

Alex Flores

G.E.C., Inc.

3013 27th St.

Metairie, La.

Dear Alex;

I have marked the map of your site with the layout of our supply lines and indicated what I believe to be their sizes. The total capacity of our system is 1.5 MGD, current capacity of 0.425 MGD and a reserve capacity of 0.54MGD. Please be aware that these figures represent estimates of the system's capacity. We are currently awaiting funding for a new well on our system approximately eight (8) miles from your site which should increase our system's capacity significantly.

Please do not hesitate to call if you have further questions.

Robert Allen

Operator/Manager, Innis Water Corporation
