Jonathan,

That's highly dependent on funding. If the port had the funds in hand, it would take about 8 months (2 months design, 2 months permitting and bidding, 4 months construction.) If securing funding is part of the timeline, stretch the timeline to 12 months.

I hope this answers your question. Let me know if you need any additional information.

Glenn

Glen,

I hate to bother you. Can you give a timeframe on the sewer expansion at the Avoyelles Port. I greatly appreciate your help

Sincerely,

Jonathan
